Use of the Holifield Facility 25-MV tandem accelerator in the Oak Ridge Radioactive Ion Beam Project, 19:1473 (R;US)
Validation of SCALE-4 criticality sequences using ENDF/B-V data, 19:1375 (R;US)
Warning systems and public warning response, 19:2244 (R;US)
X-231B technology demonstration for in situ treatment of contaminated soil: Technology evaluation and screening, 19:433 (R;US)
X-231B technology demonstration for in situ treatment of contaminated soil: Laboratory evaluation of chemical oxidation using hydrogen peroxide, 19:434 (R;US)
X-ray Absorption Spectroscopy of the Rare Earth orthophosphates, 19:1256 (R;US)

Oak Ridge National Lab., TN (United States). Carbon Dioxide Information Analysis Center
Catalog of data bases and reports, 19:1954 (R;US)

Oak Ridge Research Inst., TN (United States)
An assessment of PCB degradation by microogransims including methods for measuring mineralization, 19:1981 (R;US)
The potential human health effect(s) of the metal uranium in the environment: Report on the known human health effects associated with the exposure to the metal uranium, 19:418 (R;US)
[Technical support in the testing of microoganisms for their ability to accumulate strontium and cesium from aqueous solutions]: Final reports, Task order No. 2, 19:2197 (R;US)

Oak Ridge Y-12 Plant, TN (United States)
Dealing with the chlorinated solvent situation at the Oak Ridge Y-12 Plant, 19:1258 (R;US)
Experience with performance based training of nuclear criticality safety engineers, 19:1407 (R;US)
Groundwater quality assessment for the Chestnut Ridge Hydrogeologic Regime at the Y-12 Plant: 1991 groundwater quality data and calculated rate of contaminant migration, 19:473 (R;US)
Identification and characterization of wetlands in the Bear Creek watershed, 19:2103 (R;US)
Improving the performance of the Y-12 fluidized bed contactors: Final report on investigations at the University of Tennessee, 19:1430 (R;US)
Low toxicity aromatic diamine curing agents for adhesives, 19:1145 (R;US)
Manufacturing overview at the Department of Energy Oak Ridge facilities, 19:1408 (R;US)
PCIS1.0.1: Personal Computer Inventory System, 19:2847 (CM;US)
Remedial investigation work plan for Bear Creek Valley Operable Unit 4 (shallow groundwater in Bear Creek Valley) at the Oak Ridge Y-12 Plant, Oak Ridge, Tennessee, 19:414 (R;US)
The Holdup Measurement System II (HMSII), 19:486 (R;US)
Thermal analysis of the horizontal shipping container for normal conditions of transport with solar insolation, 19:1409 (R;US)

Office of Naval Research, Washington, DC (United States)
Users manual for the Chameleon parallel programming tools, 19:2822 (R;US)

Ohio State Univ., Columbus, OH (United States)
Development and evaluation of a neutron-gamma mixed-field dosimetry system based on a single thermoluminescence dosimeter, 19:1616 (R;US)

Ohio Univ., Athens, OH (United States). Center for Automatic Identification Education and Research
Datamatrix and PDF417 data integrity test, 19:1835 (R;US)

Oklahoma Univ., Norman, OK (United States)
Identification and evaluation of fluvial-dominated deltaic (Class I oil) reservoirs in Oklahoma: Quarterly technical progress report, April 1, 1993–June 30, 1993, 19:68 (R;US)

Oregon Graduate Center, Beaverton, OR (United States)
[Fundamental studies in oxidation-reduction in relation to water photolysis]: Progress report, June 26, 1989–November 1, 1990, 19:1275 (R;US)

Oregon Univ., Eugene, OR (United States). Inst. of Molecular Biology
Transposon-induced nuclear mutations that alter chloroplast gene expression: Annual report, September 1, 1992–April 15, 1993, 19:2130 (R;US)

Oslo Univ. (Norway). Fysisk Inst.
1992 Progress report by the Bergen-Oslo Nuclear Theory Team (BONTT), 19:2814 (R;NO)
A rotating string, 19:2349 (R;NO)
Light output and energy resolution of BGO and GSO scintillators for light ions, 19:1797 (R;NO)

P

Pacific Northwest Lab., Richland, WA (United States)
340 Facility compliance assessment, 19:308 (R;US)
A literature review of methods of analysis of organic analytes in radioactive wastes with an emphasis on sources from the United Kingdom, 19:304 (R;US)
A teleoperated system for remote site characterization, 19:2079 (R;US)
Active damping of oscillations in a long compliant manipulator link, 19:1386 (R;US)
Aerosol and vapor characterization of tank 241-C-103: Flammability assessment sampling system, and method validation, 19:305 (R;US)
Aging assessment of essential HVAC chillers used in nuclear power plants: Phase 1, Volume 1, 19:737 (R;US)
Air sampling in the workplace: Final report, 19:1953 (R;US)
An evaluation of the environmental fate and behavior of munitions materiel (Tetryl and polar metabolites of TNT) in soil and plant systems: Environmental fate and behavior of tetryl, 19:2242 (R;US)
An evaluation of the environmental fate and behavior of munitions materiel (tetryl and polar metabolites of TNT) in soil and plant systems: Preliminary evaluation of TNT-polar metabolites in plants, 19:2078 (R;US)
Analysis of volatile headspace gases sampled by cryogenic traps from Westinghouse Hanford Company Tank 242-C-112 March 1992, 19:296 (R;US)
Auxiliary feedwater system risk-based inspection guidance for the Davis-Besse nuclear power plant, 19:794 (R;US)
Cancer increase study methodology: A review and discussion of the "Southeastern Massachusetts Health Study 1978–1986", 19:2230 (R;US)
Characterization of phosphate/sulfate waste grout cores, 19:436 (R;US)
Clean option: An alternative strategy for Hanford Tank Waste Remediation: Volume 2, Detailed description of first example flowsheet, 19:295 (R;US)
Cloud-free aerosol optical depth determination over oceans from satellite radiometry, 19:1899 (R;US)
CMS Preprocessing Subsystem user's guide: Software version 1.2, 19:2870 (R;US)
Computational analysis of fluid flow and zonal deposition in ferrocyanide single-shell tanks: Ferrocyanide Safety Program, 19:306 (R;US)
Computer modeling of ORNL storage tank sludge mobilization and mixing, 19:303 (R;US)
Contribution of maternal radionuclide burdens to prenatal radiation doses: Relationships between annual limits on intake and prenatal doses: Revision 1, Addendum 1, 19:2228 (R;US)
Designing public participation training for managers, 19:840 (R;US)
Ecological evaluation of proposed dredged material from the John F. Baldwin Ship Channel: Phase 3 – biological testing, 19:2115 (R;US)
Energy savings from energy-efficient showerheads: REMP case study results, proposed evaluation algorithm, and program design implications, 19:912 (R;US)
Estimating emissions from grout pouring operations, 19:310 (R;US)

Evaluation of bubbler/diaphragm techniques to measure surface level in the waste storage tanks, 19:307 (R;US)
Evaluation of methods to measure surface level in waste storage tanks: Second test sequence, 19:301 (R;US)
Evaluation of uranium transitions for isotopically-selective laser induced fluorescence with diode lasers (Technical Report for ST064), 19:479 (R;US)
Flux stability and power control in the Soviet RBMK-1000 reactors, 19:754 (R;US)
Fort Drum integrated resource assessment: Volume 1, Executive summary, 19:960 (R;US)
Full-length high-temperature severe fuel damage test No. 2: Final safety analysis, 19:799 (R;US)
Full-length high-temperature severe fuel damage test No. 1, 19:800 (R;US)
Full-length high-temperature severe fuel damage test No. 5, 19:801 (R;US)
Griffiss Air Force Base omtegrated respirce assessment: Volume 3, Electric resource assessment, 19:910 (R;US)
Hanford Environmental Dose Reconstruction Project: Quarterly report, June–August 1993, 19:386 (R;US)
Hanford Site lighting occupancy sensor study, 19:914 (R;US)
Hanford Site Permanent Isolation Surface Barrier Development Program: Fiscal year 1992 and 1993 highlights, 19:297 (R;US)
Hydrogen generation by metal corrosion in simulated Waste Isolation Pilot Plant environments: Progress report for the period November 1989 through December 1992, 19:1436 (R;US)
Impact evaluation of adjustable speed drives installed at Hewlett-Packard Company under the Energy $avings Plan, 19:911 (R;US)
Impact of environmental dewatering of Lower Granite and Little Goose reservoirs on benthic invertebrates and macrophytes, 19:2113 (R;US)
Initial evaluation of Sandia National Laboratory-prepared crystalline silico-titanates for cesium recovery, 19:302 (R;US)
Instrument performance evaluation, 19:2233 (R;US)
Investigation of exposure rates and radionuclide and trace metal distributions along the Hanford Reach of the Columbia River, 19:2112 (R;US)
Irradiation testing of an asphalt-based grout vault sealant, 19:1131 (R;US)
Large-break LOCA, in-reactor fuel bundle Materials Test MT-6A, 19:802 (R;US)
Lincoln Park shoreline erosion control project: Monitoring for surface substrate, infaunal bivalves and eelgrass, 1993, 19:2114 (R;US)
Methodology for performing measurements to release material from radiological control, 19:1957 (R;US)
Microstructural evolution of neutron-irradiated Fe-Cr-Ni ternary alloys at high helium generation rates, 19:1038 (R;US)
Mobile Energy Laboratory Procedures, 19:860 (R;US)
N Reactor Lessons Learned workshop, 19:772 (R;US)
New residential construction compliance: Evaluation of the Washington State Energy Code program, 19:913 (R;US)
Nondestructive Examination (NDE) Reliability for Inservice Inspection of Light Water Reactors: Volume 15, Semiannual report: October 1991–March 1992, 19:793 (R;US)
Organic chemical aging mechanisms: An annotated bibliography: Waste Tank Safety Program, 19:299 (R;US)
Orientation to occupational safety compliance in DOE: Student manual, Book 1: Part 1, 19:839 (R;US)
Pacific Northwest Laboratory ALARA report for CY 1992, 19:437 (R;US)
Preliminary estimates of cost savings for defense high level waste vitrification options, 19:309 (R;US)
Radiological risk guidelines for nonreactor nuclear facilities at the Pacific Northwest Laboratory, 19:2231 (R;US)
Radiological survey of shoreline vegetation from the Hanford Reach of the Columbia River, 1990–1992, 19:385 (R;US)
Robins Air Force Base Integrated Resource Assessment: Volume 2, Baseline Detail, 19:961 (R;US)
Sensitivity study of six public health risk computation cases from the US Department of Energy risk- and cost-estimate process pilot study, 19:1956 (R;US)
Sensors in outdoor environmental monitoring and site remediation, 19:2080 (R;US)
Software Configuration Management Plan (SCMP) version 1.1, Phase 1: Federal Emergency Management Information System (FEMIS): System platform, 19:2815 (R;US)
Software requirements specifications, 19:2187 (R;US)
Solid Waste Projection Model: Database (Version 1.4): Technical reference manual, 19:298 (R;US)
Summary of recorded external radiation doses for Hanford workers 1944–1989, 19:2232 (R;US)
System design specification for the 1/4-scale tank and ancillary equipment, 19:294 (R;US)
The effect of gamma radiation on reference electrodes and platinum and carbon steel bare metal electrodes in a simulated waste solution: Final report, 19:300 (R;US)
Translative interface for data sharing and integrating: A paradigm for distributed data systems, 19:2871 (R;US)
US Department of Energy phaseout of CFC-refrigerants, 19:841 (R;US)
What can be learned from epidemiologic studies of persons exposed to low doses of radiation?, 19:2234 (R;US)
Wind energy potential in the United States, 19:612 (R;US)

^{123} I production using CV-28 cyclotron from IPEN-CNEN/SP, 19:1288 (IA;BR;In Portuguese)
^{99m} Tc of mercapto-acetyl-glycyl-glycyl-glycine: synthesis, preparation of lyophilization reactive kits and studies of biological distribution, 19:1294 (IA;BR;In Portuguese)
Absorbed doses by a technician, with and without (simulating) use of protection devices, in bone scintigraphy examination, 19:2210 (IA;BR;In Portuguese)
Angular and energetic dependence of portable detectors in beta radiation fields, 19:1630 (IA;BR;In Portuguese)
Annual average equivalent dose of workers form health area, 19:2209 (IA;BR;In Portuguese)
Automatic system for evaluation of ionizing field, 19:1622 (IA;BR;In Portuguese)
Calibration data survey of clinical dosemeters at IPEN from 1987 to 1991, 19:1634 (IA;BR;In Portuguese)
Change of energy dependence for X-rays of photodiode detector, 19:1621 (IA;BR;In Portuguese)
Circuit for current measures from ionization chambers, 19:1619 (IA;BR;In Portuguese)
Comparison of tomography reconstruction by maximum entropy and filtered retro projection, 19:2146 (IA;BR;In Portuguese)
Contribution for labelling study of blood elements with technetium-99 m, 19:2201 (IA;BR;In Portuguese)
Contribution for labelling study of cellular and molecular structures of biomedical interest with technetium 99, 19:2202 (IA;BR;In Portuguese)
Counting system for nuclear medicine, 19:1625 (IA;BR;In Portuguese)
Determination of alternative conditions for instruments calibration with beta radiation, 19:1631 (IA;BR;In Portuguese)
Development of a calibration system for surface contamination monitors, 19:1628 (IA;BR;In Portuguese)
Development of a new personnel dosemeter with Ca So_4:Dy+ PTFE, 19:1626 (IA;BR;In Portuguese)
Development of chromatographic technique for quality control of Ga-67 citrate, 19:1296 (IA;BR;In Portuguese)
Development of measure methods of radon in indoor air, 19:1912 (IA;BR;In Portuguese)
Development of Mg B_4 O_7:Dy thermoluminescent solid dosemeter for using on the thermal neutron dosimetry, 19:1627 (IA;BR;In Portuguese)
Evaluation of BPW-34 photodiode answer for 10 MeV electron dosimetry, 19:2212 (IA;BR;In Portuguese)
Evaluation of leucocytes labelling technique with ^{99m} Tc - HMPAO, 19:2203 (IA;BR;In Portuguese)
Evaluation of three acquisition modes for radionuclide ventriculography, 19:2145 (IA;BR;In Portuguese)
Fast amplification system for gamma spectroscopy, 19:1620 (IA;BR;In Portuguese)
Field dosimetry on sterilization area of medical-hospitable materials, 19:2211 (IA;BR;In Portuguese)
Geometrical efficiency in computerized tomography: generalized model, 19:2147 (IA;BR;In Portuguese)
Hardware and software for image acquisition in nuclear medicine, 19:2143 (IA;BR;In Portuguese)
Hippuran-^{123} I: labelling and quality control, 19:1293 (IA;BR;In Portuguese)
Images compression in nuclear medicine, 19:2149 (IA;BR;In Portuguese)
Implementation of a national detection plan of neonatal hypothyroidism. First year of experience from population sample, 19:2153 (IA;BR;In Spanish)
Implementation of metrology in diagnostic radiology at National Laboratory of Ionization Radiation Metrology, 19:2204 (IA;BR;In Portuguese)
Influence of lucite phantoms on calibration of dosimetric pens, 19:1636 (IA;BR;In Portuguese)
Isolation and purification of G immunoglobulin from guinea-pig for the production of a second antibody for radioimmunoassay, 19:2172 (IA;BR;In Portuguese)
Management of radioactive wastes at UFRJ, 19:268 (IA;BR;In Portuguese)
Mathematic filters and digital processing in nuclear medicine, 19:2151 (IA;BR;In Portuguese)
Mathematic filters and digital processing in nuclear medicine, 19:2152 (IA;BR;In Portuguese)
Medical and radioprotection procedures for ionizing radiations, 19:2205 (IA;BR;In Portuguese)

MIBI: preparation and evaluation of lyophilization kits, 19:1295 (IA;BR;In Portuguese)
Obtention of scintillography images by low density lipoproteins labelled with technetium 99, 19:2200 (IA;BR;In Portuguese)
Occupational radioprotection program at Nuclear Engineering Institute -IEN: results obtained in 1991, 19:2206 (IA;BR;In Portuguese)
Personnel monitoring in workers from North and Northeast of Brazil, occupationally exposed to ionizing radiations, 19:2208 (IA;BR;In Portuguese)
Polymer-ceramic piezoelectric composites (PZT), 19:1087 (IA;BR;In Portuguese)
Proceedings of the 1. National Forum of Science and Technology on Health; 13. Brazilian Congress on Biomedical Engineering; 4. Brazilian Congress of Physicists on Medicine; Brazilian Meeting on Biology and Nuclear Medicine; Brazilian Meeting on Radiological Protection, 19:2142 (I;BR;In Portuguese)
Proposal of a research and development program for cerebral tumor treatment by neutron capture, 19:2155 (IA;BR;In Portuguese)
Quality control of calibration system for area monitors at National Laboratory of Metrology from Ionizing Radiations (LNMRI), 19:1633 (IA;BR;In Portuguese)
Quality control of secondary standards and calibration systems, therapy level, of National Laboratory of Metrology from Ionizing Radiations (LNMRI), 19:1635 (IA;BR;In Portuguese)
Quality evaluation of mammography systems: identification of the best region by the transfer function method, 19:2154 (IA;BR;In Portuguese)
Radioprotection in Brazilian universities, 19:2207 (IA;BR;In Portuguese)
Response variation of parallel plates chambers with the diameter of x-radiation field (30 kV), 19:1632 (IA;BR;In Portuguese)
Solid water phantom, 19:492 (IA;BR;In Portuguese)
Specification and tests of three prototypes from tissue-equivalent ionization chamber, 19:1624 (IA;BR;In Portuguese)
Specification of a dosimetric system for daily monitoring of linear accelerators, 19:1623 (IA;BR;In Portuguese)
Study for thallium-201 preparation at IPEN-CNEN/SP, 19:1289 (IA;BR;In Portuguese)
Study of answer from different types of radioprotection instruments used in beta dosimetry, 19:1629 (IA;BR;In Portuguese)
Study of Compton scattering influence in cardiac SPECT images, 19:2148 (IA;BR;In Portuguese)
Study of detection probability from lesion by scintiscanning, 19:2150 (IA;BR;In Portuguese)
The present situation of radioisotope production in cyclotron CV-28 at IEN, 19:1291 (IA;BR;In Portuguese)
Use of microdosimetric techniques related to cancer therapy with high energy protons, 19:1637 (IA;BR;In Portuguese)
Validation study of linear distance measurements from CT scans using a multiplanar reformatting system, 19:2144 (IA;BR)
Yield analysis of radioisotope production obtained in cyclotron with protons of E $<$ 24 and 30 MeV for using in nuclear medicine, 19:1290 (IA;BR;In Portuguese)
$[^{99m}Tc\ (CNCH_2COO^-)_6]^{-5}$: preliminary evaluation as tracer for studies of renal function, 19:1292 (IA;BR;In Spanish)

Sociedade Brasileira de Engenharia Biomedica, Sao Paulo, SP (Brazil)

^{123}I production using CV-28 cyclotron from IPEN-CNEN/SP, 19:1288 (IA;BR;In Portuguese)

Personal Author Index

Authors' surnames are indexed in the form appearing in the publication cited; given names generally have been reduced to initials. For documents with multiple authors, each author name is indexed. The entry for a primary author (first author listed on an abstracted document) includes the full document title and citation number. Entries for other authors provide a cross-reference to the primary author. Also included is information on the document type, country of publication, and the document language listed in parentheses in the format (J;FR;In French and English). Accent marks are not input because of computer alphabetization. Spelling and transliteration follow standard conventions.

Subject Index

This index is arranged by subject descriptors selected from those assigned to each citation in this publication. Subject descriptors are selected from a controlled thesaurus of terms, ETDE/PUB–2, *International Energy: Subject Thesaurus*. In order to enhance indexing, subject descriptor entries generally consist of a pair of descriptors: a main term and a qualifier term. Each entry includes the full title (which may be followed by supplementary descriptive information in parentheses) and the citation number. Additional information given in parentheses indicates the document type (an abbreviation such as B for book), the country of publication (such as DE for Federal Republic of Germany), and the language if non-English.

See references guide users from synonymous terms to the descriptors selected for the concept. *See also* references indicate subject concepts that are more specific than a particular descriptor. To gain complete subject coverage, all such terms should be reviewed.

Reaction product imaging, 19:1260 (RA;US)
Theoretical studies of the dynamics of chemical reactions, 19:1363 (RA;US)
Time-resolved FTIR emission studies of laser photofragmentation and radical reactions, 19:1338 (RA;US)

DEUTERIUM COMPOUNDS
Coherent phase control of the photodissociation of HOD, 19:2546 (R;US)
Kinetic and mechanistic studies of free-radical reactions in combustion, 19:1361 (RA;US)
Kinetic energy dependence of ion-molecule reaction: Recent experimental results, 19:2553 (RA;CZ)
Reaction product imaging, 19:1260 (RA;US)
The photodissociation and reaction dynamics of vibrationally excited molecules, 19:1261 (RA;US)
Theoretical studies of combustion dynamics, 19:1308 (RA;US)

DEUTERIUM IONS
Measurement of fluences and energy of D^+ emitted from plasma focus in capacitor bank energies interval of 1-30 KJ, 19:2688 (IA;CN)

DEUTERIUM OXIDE
See HEAVY WATER

DEUTERIUM TARGET
Consistent analysis of the spin content of the nucleon, 19:2439 (R;GB)
Deep inelastic lepton scattering on nuclei: operator product expansion and meson-nucleon theory, 19:2363 (R;RU)
Electrodisintegration of the deuteron near threshold with allowance for meson exchange currents. Retardation effects, 19:2501 (R;RU)
Microscopic calculations of nucleon-nucleus scattering in glauber theory, 19:2502 (R;RU)
On the contribution of bremsstrahlung to the ptoduction of lepton pairs at intermediate energies, 19:2395 (R;RU;In Russian)
Studies of the deuteron at high energy and momentum transfer, 19:2373 (R;US)

DEUTERIUM-LITHIUM HIGH FLUX NEUTRON SOURCE FACILITY
See NEUTRON SOURCE FACILITIES

DEUTERON REACTIONS
Electric optical potential for weakly-bound particles, 19:2451 (IA;UA)
Investigation of strong interactions at very low energies (50 eV - 1000 eV), 19:2496 (R;RU)
Polarization transfer in deuteron break-up at 0 deg measuring with ANOMALON polarimeter at JINR synchrophasotron, 19:2503 (R;RU)
Tensor analyzing power of nuclear fragmentation of relativistic deuterons with proton emission at non-zero angles, 19:2499 (R;RU)

DEUTERON-DEUTERON INTERACTIONS
See DEUTERIUM TARGET
DEUTERON REACTIONS

DEUTERONS
Deuteron photodisintegration: Data and plans, 19:2455 (R;US)
Low temperature diffusion of hydrogenic species in oxide crystals: Radiation induced diffusion, 19:1081 (R;US)
Neutron-induced particle production in the cumulative and noncumulative regions at intermediate energies, 19:2500 (R;RU)

DEXTRAN
Capillary electrokinetic separations with optical detection: Technical progress report, February 1, 1993–January 31, 1994, 19:1155 (R;US)

DIAGNOSTIC TECHNIQUES
See also BIOMEDICAL RADIOGRAPHY
NMR IMAGING
TOMOGRAPHY
Interpretation of the MEG-MUSIC scan in biomagnetic source localization, 19:2176 (R;US)

DIAMONDS
Fabrication of amorphous diamond films, 19:1138 (R;US)
High power, electron-beam induced switching in diamond, 19:1455 (R;US)

DIAPHRAGMS (THERMONUCLEAR DEVICE)
See LIMITERS

DIBARYON RESONANCES
See DIBARYONS

DIBARYONS
NN-interaction in $^1S_0$-state: virtual level or dibaryon resonance, 19:2413 (R;RU;In Russian)
Strange cluster formation in relativistic heavy ion collisions, 19:2459 (R;US)

DICHLOROMETHANE
See METHYLENE CHLORIDE

DIELECTRIC MATERIALS
Dielectric properties and electronic applications of aerogels, 19:1107 (R;US)
Non-destructive characterization techniques for rapid optical and structural analysis of dielectric thin films, 19:1431 (R;IN)

DIELECTRIC TRACK DETECTORS
Abstracts
16. international conference on nuclear tracks in solids: abstracts, 19:1640 (I;CN)
Age Estimation
Ageing, fading and background study of various nuclear track detectors, 19:1726 (IA;CN)
Aging
Ageing effects on a new polymeric track detector SR-90 and a model of the nuclear track formation, 19:1686 (IA;CN)
Alpha Detection
Application of track detectors for soil, water and objects' surfaces alpha-activity measurement in 30-km zone of the Chernobyl NPP, 19:702 (IA;CN)
Alpha Spectrometers
Performance of the alpha-spectrometer CR-39 versus etching time and its possible application in radon/thoron discrimination, 19:1757 (IA;CN)
Autoradiography
Application of CR-39 (DAP) detectors for alpha autoradiography of tissues, 19:1719 (IA;CN)
Background Noise
Ageing, fading and background study of various nuclear track detectors, 19:1726 (IA;CN)

Beam Profiles
Reactor beam profile measurements with electrochemically etched track detectors, 19:1744 (IA;CN)

Biological Radiation Effects
On the impact of nuclear track science for recording the effects of radioactive environmental interactions in biology, 19:1701 (IA;CN)

Calibration
Calibration of the CR39 used in the macro-experiment, 19:1662 (IA;CN)
Calibration of various types of CR-39-based neutron dosimeters in a heavy water moderated and monoenergetic neutron fields: Pt. 1: Theoretical, 19:1742 (IA;CN)
Theoretical determination of calibration coefficient for radon measurements with CR 39, 19:1698 (IA;CN)

Cold Fusion
Detection of anomalous nuclear effect in deuterium/solid systems using CR-39, 19:2687 (IA;CN)

Comparative Evaluations
Application and evaluation of solid state nuclear track detectors for radon measurement, 19:1670 (IA;CN)
Comparison between SR-90 and CR-39, 19:1711 (IA;CN)
Comparison of effectiveness of 3 radon detectors (LR 115, CR 39 and Silicon Diode Pin) placed in a cylindrical device: theory and experimental techniques, 19:1758 (IA;CN)

Crystal Doping
Optimization of dopants in CR-39, 19:1718 (IA;CN)

Dosemeters
CR-39 and LR-115 as a secondary standard dosimeter for radon measurements, 19:1755 (IA;CN)
Calibration of various types of CR-39-based neutron dosimeters in a heavy water moderated and monoenergetic neutron fields. Pt. 2: Experimental, 19:1700 (IA;CN)

Dusts
An investigation on in-air distribution of metal dust during machining, using solid state nuclear track detectors, 19:1754 (IA;CN)

Energy Dependence
Energy response of electrochemically etched PADC at different angles, 19:1748 (IA;CN)

Environmental Impacts
On the impact of nuclear track science for recording the effects of radioactive environmental interactions in biology, 19:1701 (IA;CN)

Errors
Statistics and error considerations at the application of SSNTD-technique in radon measurement, 19:1682 (IA;CN)

Etching
A new parameter in the ECE of polymer track detectors, 19:1725 (IA;CN)
A quick DYECET method of ECE tracks in polymeric detectors, 19:1680 (IA;CN)
Angular dependence of proton response in CR-39 track detector, 19:1649 (IA;CN)
Bulk etching rate of irradiated Lexan polycarbonate measuring fission track diameters, 19:1713 (IA;CN)
Effects of gamma irradiation on the bulk and track etching properties of cellulose nitrate (Daicel 6000) and CR-39 plastics, 19:1679 (IA;CN)
Electrochemical etching of CR-39 track detectors at room temperature, 19:1728 (IA;CN)
Identification of recoil particles using track-coincidence and multiple track etching method, 19:1651 (IA;CN)
Presoaking-induced modifications of the etching process in CR-39, 19:1720 (IA;CN)
Study of the two-step electrochemical etching conditions applied to polycarbonate detectors used in radon diffusion chambers, 19:1764 (IA;CN)
The etching characteristics of phosphate glass track detectors, 19:1732 (IA;CN)
V_T(track etch rate): reflection of total energy-loss rate (dE/dX) for ^{238}U in CR-39, 19:1681 (IA;CN)

Geochemistry
The application of the ARG- and SSNTD-methods in the geochemical investigation of gold and uranium, 19:2033 (IA;CN)

Glass
Effect of reactor irradiation and kinetics of fission track formation in high purity quartz glass, 19:1689 (IA;CN)
Heavy ion ranges in glass detectors, 19:1710 (IA;CN)
Mean ranges of ^{209}Bi ions in ZnP-glass detector, 19:2593 (IA;CN)
The etching characteristics of phosphate glass track detectors, 19:1732 (IA;CN)

Heavy Ions
Heavy ion ranges in glass detectors, 19:1710 (IA;CN)
Heavy ion response of SR-90 and CR-39 track detectors, 19:1709 (IA;CN)
Sensitivity study of hungarian made CR-39 for heavy ion tracks, 19:1715 (IA;CN)
Stopping power and range determination of relativistic and non-relativistic heavy ions in different materials including solid nuclear track detectors, 19:1688 (IA;CN)

High Energy Physics
Nuclear emulsion and plastic track detectors applied to high energy physic: hybrid experiments in the past and present decade, 19:1695 (IA;CN)

Hungary
Sensitivity study of hungarian made CR-39 for heavy ion tracks, 19:1715 (IA;CN)

Hydrogen
Effects of atomic hydrogen on polymeric track detectors, 19:1677 (IA;CN)

Image Processing
Characterisation of nuclear track detector response by microtopography observations and image analysis, 19:1734 (IA;CN)
Image processing techniques for SSNTDS measurements, 19:1736 (IA;CN)

Images
CR-39 imaged by atomic force microscope, 19:1693 (IA;CN)

Incidence Angle
Angular dependence of proton response in CR-39 track detector, 19:1649 (IA;CN)

Ion-Atom Collisions
Interaction of ^{16}O and ^{19}F ions with thick copper target at relativistic energies, 19:2471 (IA;CN)
Interaction of 15.9 MeV/u ^{197}Au ions with ^{nat}Au and ^{209}Bi as targets on CR-39 plastic track detectors, 19:2472 (IA;CN)

Iron Ores
Growth rates of the ferro manganese nodules obtained by the cellulose nitrate detector LR-115, 19:2036 (IA;CN)

Manganese Ores
Growth rates of the ferro manganese nodules obtained by the cellulose nitrate detector LR-115, 19:2036 (IA;CN)

Materials
Shrimp shells as nuclear track detectors, 19:1722 (IA;CN)

Microscopes
CR-39 imaged by atomic force microscope, 19:1693 (IA;CN)

Neutron Detection
Fast neutron energy and angle response of electrochemically etched CR-39 plastic detectors, 19:1699 (IA;CN)

Neutron Dosimetry
A long-term study of CR-39 detectors for neutron dosimetry, 19:1750 (IA;CN)
Calibration of various types of CR-39-based neutron dosimeters in a heavy water moderated and monoenergetic neutron fields: Pt. 1: Theoretical, 19:1742 (IA;CN)
Use of CR-39 track detector in personnel neutron dosimetry, 19:1661 (IA;CN)

Neutron Fluence
Measurement of 14 MeV neutron fluences using SSNTDs, 19:1751 (IA;CN)

Nuclear Fragments
Study of high energy heavy fragments from the interaction of 3.65 A GeV ^{19}F or ^{16}O with Cu, 19:2465 (IA;CN)

Nuclear Physics
Application of SSNTD in Nuclear Physics, 19:1652 (IA;CN)

Organic Polymers
Optimization of dopants in CR-39, 19:1718 (IA;CN)

Particle Discrimination
A simple technique to discriminate various charged particles using SSNTDs, 19:1747 (IA;CN)
Performance of the alpha-spectrometer CR-39 versus etching time and its possible application in radon/thoron discrimination, 19:1757 (IA;CN)
Particle Identification
Identification of recoil particles using track-coincidence and multiple track etching method, 19:1651 (IA;CN)
Particle Tracks
Study of latent heavy ion tracks in SSNTD by small-angle neutron scattering, 19:1668 (IA;CN)
Track counting by an image analysing system, 19:1735 (IA;CN)
Performance
Features of a new Russian track detector for radon measurement, 19:1759 (IA;CN)
Personnel Dosimetry
Use of CR-39 track detector in personnel neutron dosimetry, 19:1661 (IA;CN)
Polycarbonates
Bulk etching rate of irradiated Lexan polycarbonate measuring fission track diameters, 19:1713 (IA;CN)
Discovery of some phenomena in polycarbonate detectors by the introduction of a new triplet ECE technique, 19:1674 (IA;CN)
Reactor irradiation effects and kinetics of fission track formation on 'CR-39' cross-linked polycarbonate, 19:1690 (IA;CN)
Study of the two-step electrochemical etching conditions applied to polycarbonate detectors used in radon diffusion chambers, 19:1764 (IA;CN)
Polymers
A new parameter in the ECE of polymer track detectors, 19:1725 (IA;CN)
Ageing effects on a new polymeric track detector SR-90 and a model of the nuclear track formation, 19:1686 (IA;CN)
Comparison between SR-90 and CR-39, 19:1711 (IA;CN)
Effects of atomic hydrogen on polymeric track detectors, 19:1677 (IA;CN)
Study on effect of neutron radiation on CR-39 and surface of CR-39, 19:1279 (IA;CN)
Theory of latent radiation damage in polymers, 19:1642 (IA;CN)
Polypropylene
Registration temperature effect in polypropylene detectors, 19:1729 (IA;CN)
Power Density
Research of reactor power measurement by SSNTD, 19:1660 (IA;CN)
Protons
Proton response of CR-39 (PM-355), 19:1712 (IA;CN)
Quantitative Chemical Analysis
Assessment of SSNTD technique for quantitative estimation of UO_2 content in natural UO_2-ThO_2 mixed oxide pellets in comparison to X-ray fluorescence, alpha and gamma spectrometry, 19:1213 (IA;CN)
Radiation Effects
Effect of reactor irradiation and kinetics of fission track formation in high purity quartz glass, 19:1689 (IA;CN)
Effects of gamma irradiation on the bulk and track etching properties of cellulose nitrate (Daicel 6000) and CR-39 plastics, 19:1679 (IA;CN)
Reactor irradiation effects and kinetics of fission track formation on 'CR-39' cross-linked polycarbonate, 19:1690 (IA;CN)
The effect of X-ray irradiation on track formation in LR-115 type II track detector, 19:1807 (IA;CN)
Radiation Monitoring
Nuclear track detectors for radon monitoring in coal mines in Kouzbass Siberian region (Russian Confederation), 19:1665 (IA;CN)
Radon
CR-39 and LR-115 as a secondary standard dosemeter for radon dose calibration, 19:1672 (IA;CN)
CR-39 and LR-115 as a secondary standard dosimeter for radon measurements, 19:1755 (IA;CN)
Comparison of effectiveness of 3 radon detectors (LR 115, CR 39 and Silicon Diode Pin) placed in a cylindrical device: theory and experimental techniques, 19:1758 (IA;CN)
Features of a new Russian track detector for radon measurement, 19:1759 (IA;CN)
Radon measurements with LR115 and CR-39, 19:1756 (IA;CN)
The measurement of equilibrium factor for radon by SSNTD, 19:1917 (IA;CN)
Theoretical determination of calibration coefficient for radon measurements with CR 39, 19:1698 (IA;CN)
Radon 222
CR-39 Rn-222 detectors, 19:1684 (IA;CN)
Measurement of concentrations of radon and its daughters in indoor atmosphere using CR-39 nuclear track detector, 19:1208 (IA;CN)
Response Functions
Characterisation of nuclear track detector response by microtopography observations and image analysis, 19:1734 (IA;CN)
Fast neutron energy and angle response of electrochemically etched CR-39 plastic detectors, 19:1699 (IA;CN)
Heavy ion response of SR-90 and CR-39 track detectors, 19:1709 (IA;CN)
Proton response of CR-39 (PM-355), 19:1712 (IA;CN)
Sensitivity
Detection threshold, 19:1667 (IA;CN)
Pre-soak studies with CR-39 and lexan, 19:1683 (IA;CN)
Radon measurements with LR115 and CR-39, 19:1756 (IA;CN)
Response of sensitive solid state track detectors region as a visualization result of some part of its physical states, 19:1678 (IA;CN)
Solar Neutrinos
Etched track detectors in solar neutrino experiments, 19:1648 (IA;CN)
Statistics
Statistics and error considerations at the application of SSNTD-technique in radon measurement, 19:1682 (IA;CN)
Temperature Dependence
Registration temperature effect in polypropylene detectors, 19:1729 (IA;CN)
Threshold Energy
Detection threshold, 19:1667 (IA;CN)
Uses
Advances in solid state nuclear track detectors, 19:1641 (IA;CN)
Application and evaluation of solid state nuclear track detectors for radon measurement, 19:1670 (IA;CN)
X Radiation
The effect of X-ray irradiation on track formation in LR-115 type II track detector, 19:1807 (IA;CN)
Zinc Phosphides
Mean ranges of ^{209}Bi ions in ZnP-glass detector, 19:2593 (IA;CN)
DIELECTRICS

Calibration
Calibration of various types of CR-39-based neutron dosimeters in a heavy water moderated and monoenergetic neutron fields. Pt. 2: Experimental, 19:1700 (IA;CN)
Dielectric Track Detectors
A wide range neutron dosemeter based on CR-39 track detectors, 19:1658 (IA;CN)
Reassessment of the CR-39 based cubical neutron dosimeter, 19:1746 (IA;CN)
Gamma Radiation
Calibration data survey of clinical dosemeters at IPEN from 1987 to 1991, 19:1634 (IA;BR;In Portuguese)
Geometry
Radon dosimeter: optimization of geometrical parameters for underground measurements, 19:1763 (IA;CN)
Interference
Effect of presence of gamma rays with neutron fields on the performance of a CR-39-based cubical neutron dosimeter, 19:1745 (IA;CN)
Linear Accelerators
Specification of a dosimetric system for daily monitoring of linear accelerators, 19:1623 (IA;BR;In Portuguese)
Materials
Development of an alanine dosimeter for gamma dosimetry in mixed environments, 19:1798 (R;US)
Microdosimetry
Use of microdosimetric techniques related to cancer therapy with high energy protons, 19:1637 (IA;BR;In Portuguese)
Neutron Detection
A wide range neutron dosemeter based on CR-39 track detectors, 19:1658 (IA;CN)
Calibration of various types of CR-39-based neutron dosimeters in a heavy water moderated and monoenergetic neutron fields. Pt. 2: Experimental, 19:1700 (IA;CN)
Effect of presence of gamma rays with neutron fields on the performance of a CR-39-based cubical neutron dosimeter, 19:1745 (IA;CN)
Reassessment of the CR-39 based cubical neutron dosimeter, 19:1746 (IA;CN)
Personnel Dosimetry
Passive radon personal dosemeter, 19:1697 (IA;CN)
Proton Beams
Use of microdosimetric techniques related to cancer therapy with high energy protons, 19:1637 (IA;BR;In Portuguese)
Quality Control
Quality control of secondary standards and calibration systems, therapy level, of National Laboratory of Metrology from Ionizing Radiations (LNMRI), 19:1635 (IA;BR;In Portuguese)
Radiation Monitoring
Specification of a dosimetric system for daily monitoring of linear accelerators, 19:1623 (IA;BR;In Portuguese)
Radon
Radon dosimeter: optimization of geometrical parameters for underground measurements, 19:1763 (IA;CN)
Soil radon dosimeter for hot humid tropical region, 19:1762 (IA;CN)
X Radiation
Calibration data survey of clinical dosemeters at IPEN from 1987 to 1991, 19:1634 (IA;BR;In Portuguese)

DOSIMETERS
See DOSEMETERS

DOSIMETRY

GROUND WATER

Chemical Analysis
Guidance document for preparing water sampling and analysis plans for UMTRA sites: Final [report], 19:405 (R;US)
UMTRA water sampling and analysis plan, Tuba City, Arizona: Draft, 19:403 (R;US)

Colloids
Characterization of natural groundwater colloids at Palmottu, 19:2108 (RA;FI)

Contamination
Application of spectral gamma-ray borehole geophysics for characterization of radionuclide contamination at Hanford, 19:357 (R;US)
Baseline risk assessment for groundwater contamination at the uranium mill tailings site near Monument Valley, Arizona: Draft, 19:400 (R;US)
Baseline risk assessment of groundwater contamination at the uranium mill tailings site near Shiprock, New Mexico: Draft, 19:401 (R;US)
Characterization and reclamation assessment for the Central Shops Diesel Storage Facility, Savannah River Site, Aiken, South Carolina, 19:2094 (R;US)
Cost benefit analysis of remediation alternatives for controlling the flux of strontium-90 into the Columbia River, 19:459 (R;US)
Programmatic Environmental Impact Statement for the Uranium Mill Tailings Remedial Action Ground Water Project, 19:398 (R;US)
Radiological survey of shoreline vegetation from the Hanford Reach of the Columbia River, 1990–1992, 19:385 (R;US)
Remedial investigation work plan for Bear Creek Valley Operable Unit 4 (shallow groundwater in Bear Creek Valley) at the Oak Ridge Y-12 Plant, Oak Ridge, Tennessee, 19:414 (R;US)

Flow Models
Sanitary landfill local-scale flow and transport modeling in support of alternative concentrations limit demonstrations, Savannah River Site, 19:378 (R;US)

Flow Rate
Initial two dimensional groundwater flow calculations for SITE-94, 19:334 (R;SE)

Fluid Flow
Aquifer characterization and groundwater modeling in support of remedial actions at the Weldon Spring Site, 19:392 (R;US)
Preliminary modeling of moisture movement in the tuff beneath Mortandad Canyon, Los Alamos National Laboratory, 19:277 (R;US)

Geochemistry
Groundwater chemistry at Haestholmen, Loviisa: Summary of investigations in 1980-1992, 19:2123 (R;FI;In Finnish)
Groundwater chemistry of the gabbro bodies at Kivetty and Syyry, 19:2124 (R;FI;In Finnish)

Liquid Flow
Deep groundwater flow at Palmottu, 19:2106 (RA;FI)
Structural interpretation for mapping of groundwater flow paths at Palmottu U-Th-mineralization, 19:2107 (RA;FI)

Monitoring
Groundwater quality assessment for the Chestnut Ridge Hydrogeologic Regime at the Y-12 Plant: 1991 groundwater quality data and calculated rate of contaminant migration, 19:473 (R;US)
Integrating state-of-the-science technology for a cost-effective hazardous waste site characterization, 19:1977 (R;US)
Long-term surveillance plan for the Lowman, Idaho, disposal site, 19:245 (R;US)
Sanitary Landfill groundwater monitoring report: Second quarter 1993, 19:2099 (R;US)
Statistical application of groundwater monitoring data at the Hanford Site, 19:388 (R;US)
Status of remedial investigation activities in the Hanford Site 300 Area groundwater operable unit, 19:458 (R;US)

Radionuclide Migration
Colloid migration in groundwaters: geochemical interactions of radionuclides with natural colloids, 19:1991 (RA;XE)
Elements present in leach solutions from unsaturated spent fuel tests, 19:236 (R;US)
Groundwater migration of radionuclides at Fermilab, 19:1999 (R;US)
Post-closure performance assessment of waste packages for the Yucca Mountain Project, 19:340 (R;US)
The role of colloids in the transport of radioelements by groundwater, 19:1990 (RA;XE)

Remedial Action
Environmental restoration/waste management-applied technology semiannual report, January–June 1992: Volume 1, No. 1, 19:451 (R;US)
FY 93 site characterization status report and data package for the carbon tetrachloride site, 19:465 (R;US)
Groundwater quality assessment for the Chestnut Ridge Hydrogeologic Regime at the Y-12 Plant: 1991 groundwater quality data and calculated rate of contaminant migration, 19:473 (R;US)

Innovative environmental restoration and waste management technologies at Argonne National Laboratory, 19:390 (R;US)
Optimal field-scale groundwater remediation using neural networks and the genetic algorithm, 19:448 (R;US)
Programmatic Environmental Impact Statement for the Uranium Mill Tailings Remedial Action Ground Water Project, 19:398 (R;US)
Remediation plan for Well 399-1-16C, 19:463 (R;US)
Site environmental report for calendar year 1992, Kansas City Plant, Kansas City, Missouri, 19:2072 (R;US)
Technical assistance contractor Management Plan: Final [report], 19:399 (R;US)
X-231B technology demonstration for in situ treatment of contaminated soil: Technology evaluation and screening, 19:433 (R;US)

Sampling
Guidance document for preparing water sampling and analysis plans for UMTRA sites: Final [report], 19:405 (R;US)
Report on the radiochemical and environmental isotope character for monitoring well UE-1-q: Groundwater Characterization Program, 19:2082 (R;US)
UMTRA water sampling and analysis plan, Tuba City, Arizona: Draft, 19:403 (R;US)

Water Pollution
Groundwater impact assessment report for the 284-WB Powerplant Ponds, 19:2087 (R;US)

Water Quality
Drinking Water Program 1992 annual report, 19:1984 (R;US)
Groundwater quality assessment for the Chestnut Ridge Hydrogeologic Regime at the Y-12 Plant: 1991 groundwater quality data and calculated rate of contaminant migration, 19:473 (R;US)

Water Treatment
Treatability studies on F/H Area "hot spot" groundwater composite: Revision 1, 19:472 (R;US)

GROUND-WATER RESERVES
See AQUIFERS

GROUTING
Irradiation testing of an asphalt-based grout vault sealant, 19:1131 (R;US)

GULF OF MEXICO
Assist in the recovery of bypassed oil from reservoirs in the Gulf of Mexico: Quarterly status report, April 1, 1993–June 30, 1993, 19:73 (R;US)

HELIUM 6 REACTIONS
LEAD 208 REACTIONS
LITHIUM 9 REACTIONS
OXYGEN 16 REACTIONS
QUASI-FISSION
URANIUM 238 REACTIONS
Diffraction description of particle spectra from transfer reactions at high excitation energies of nuclei, 19:2486 (IA;UA)
Heavy ion reaction systematics observed with SSNTDS, 19:2470 (IA;CN)
Influence of angular momentum on fission fragment mass and energy distributions, 19:2510 (R;RU;In Russian)
Light particle emission in dissipative collisions, 19:2448 (IA;UA)
Low p_T phenomena observed in high energy nuclear collisions, 19:2515 (R;US)
Strange cluster formation in relativistic heavy ion collisions, 19:2459 (R;US)
Time evolution of the nuclear reaction process, 19:2445 (IA;UA)
Wide angle emission of heavy fragments in relativistic heavy ion collisions and some open problems, 19:2462 (IA;CN)
HEAVY IONS
Heavy ion ranges in glass detectors, 19:1710 (IA;CN)
Heavy ion ranges in plastic track detectors, 19:1717 (IA;CN)
Recovery stages of heavy ions induced damage in crystalline minerals, 19:2592 (IA;CN)
Scanning tunneling microscopy study of heavy ion tracks, 19:2328 (IA;CN)
Semiempirical studies of atomic structure: Progress report, 1 July 1991–1 October 1993, 19:2530 (R;US)
Stopping power and range determination of relativistic and non-relativistic heavy ions in different materials including solid nuclear track detectors, 19:1688 (IA;CN)
HEAVY LEPTONS
Production, collection and utilization of very long-lived heavy charged leptons, 19:2405 (R;US)
HEAVY NUCLEI
See also BISMUTH 209
IRIDIUM 193
PLATINUM 186
POLONIUM 204
POLONIUM 206
RADIUM 226
RADON 222
TANTALUM 181
TANTALUM 182
THALLIUM 201

Applications of a global nuclear-structure model to studies of the heaviest elements, 19:2437 (R;US)
Symmetry-dictated trucation: Solutions of the spherical shell model for heavy nuclei, 19:2304 (R;US)

HEAVY OILS
See PETROLEUM

HEAVY WATER
Coherent phase control of the photodissociation of HOD, 19:2546 (R;US)

HEAVY WATER COOLANT
See HEAVY WATER

HEAVY WATER COOLED REACTORS
See also NRU REACTOR
Evaluation of existing technology base for candidate fuels for the HWR-NPR: New Production Reactors Program, 19:759 (R;US)
New production reactor flow instability experiments with coolant upflow: Executive summary, 19:762 (R;US)
New production reactor flow instability experiments with coolant upflow: Volume 3, Uncertainty analysis, 19:763 (R;US)

HEAVY WATER MODERATOR
See HEAVY WATER

HEISSDAMPFREAKTORANLAGE
See HDR REACTOR

HELAC
See LINEAR ACCELERATORS

HELIOTRON
Improved models of β-limit, anomalous transport and radial electric field with loss cone loss in Heliotron/torsatron, 19:2696 (R;JP)
K_ϵ model of anomalous transport in resistive interchange turbulence, 19:2695 (R;JP)

HELIUM
Atomic probes of surface structure and dynamics: Technical progress report, September 15, 1991–September 14, 1992, 19:1156 (R;US)
Crossed-beam studies of the dynamics of radical reactions, 19:1341 (RA;US)
The effect of Compton scattering on the double to single ionization ratio in helium, 19:2555 (R;US)

HELIUM 3 REACTIONS
Investigation of strong interactions at very low energies (50 eV - 1000 eV), 19:2496 (R;RU)
Scattering of ^{3}He on ^{12}C and inelastic form factor, 19:2505 (R;RU)
The ^{7}Be yields from α-pickup (^{3}He,^{7}Be) reactions on lig ht nucleus, 19:2490 (IA;UA)
Vertex constant and spectroscopic factors from analysis of (^{3}He,d) reactors on ^{9} Be, ^{11} B and ^{12} C nuclei, 19:2487 (IA;UA)

HELIUM 3 TARGET
Measurement of the asymmetry in $^3\vec{H}e(\vec{e},e')$ quasielastic scattering, 19:2454 (R;US)

HELIUM 4 TARGET
Microscopic calculations of nucleon-nucleus scattering in glauber theory, 19:2502 (R;RU)

HELIUM 6 REACTIONS
Electric optical potential for weakly-bound particles, 19:2451 (IA;UA)
Investigation of β-delayed neutron emission and elastic scattering of neutron-rich isotopes of He and Li, 19:2489 (IA;UA)

HELIUM 8 BEAMS
Correlative experiments with radioactive beams, 19:2484 (IA;UA)

HELIUM DILUTION REFRIGERATORS
Powerful ^{3}He-^{4}He dilution refrigerator for a target with frozen polarization of nuclei, 19:2301 (R;RU;In Russian)

HELIUM HYDRIDES
Dissociative recombination of stored and phase-spaced cooled molecular ions in CRYRING, 19:2551 (R;US)

HELIUM METHOD
See ISOTOPE DATING

HELIUM PRODUCTION RATES
See GAS PRODUCTION RATES

HERBICIDES
Guntersville Reservoir Herbicide Monitoring Survey, 1990, 19:2122 (R;US)

HEREDITARY DISEASES
Subnormal albumin gene expression is associated with weight loss in immunodeficient/DNA-repair-deficient wasted mice, 19:2161 (R;US)

HEREDITY
See GENETICS

HETEROGENEOUS CATALYSIS
Oxidative coupling of methane to C_{2+} hydrocarbons. Basis of catalyst mode of operation and process optimization, 19:937 (R;FR)
Theoretical studies of molecular interactions, 19:1152 (RA;US)

HEXENES
Organometallic chemistry of bimetallic compounds: Annual progress report, 19:1244 (R;US)

HF RADIATION
See SHORT WAVE RADIATION

HFIR REACTOR
Fracture fragility of HFIR vessel caused by random crack size or random toughness, 19:761 (R;US)
Fuel-Coolant-Interaction modeling and analysis work for the High Flux Isotope Reactor Safety Analysis Report, 19:797 (R;US)

HHIRF
See HHIRF ACCELERATOR

HHIRF ACCELERATOR
Use of the Holifield Facility 25-MV tandem accelerator in the Oak Ridge Radioactive Ion Beam Project, 19:1473 (R;US)

HIGGS BOSONS
Effective Lagrangian for gluons and Higgs pseudoscalars, 19:2356 (R;US)
Signal and background in NLO QCD for the search of the intermediate mass Higgs boson at the SSC, 19:2415 (R;US)

HIGH ENERGY PHYSICS
1992 Progress report by the Bergen-Oslo Nuclear Theory Team (BONTT), 19:2814 (R;NO)
Changes in science: An example, 19:2330 (R;US)
Progress report of BONTT - 1991, 19:2800 (R;NO)

HIGH ENERGY RADIOTHERAPY
See RADIOTHERAPY

HIGH EXPLOSIVES
See CHEMICAL EXPLOSIVES

HIGH FLUX ISOTOPE REACTOR
See HFIR REACTOR

HIGH FLUX NEUTRON SOURCE FACILITY
See NEUTRON SOURCE FACILITIES

HIGH FREQUENCY RADIATION
See SHORT WAVE RADIATION

HIGH TEMPERATURE GAS COOLED AND GRAPHITE MODERATED REACTORS
See HTGR TYPE REACTORS

HIGH-FREQUENCY DISCHARGES
Characterization of microwave plasma generated in inhomogeneous magnetic field, 19:2684 (RA;CZ)
Langmuir probe measurement in the rf low pressure jet plasma-chemical reactor, 19:2677 (RA;CZ)
Optical diagnostics of inductively coupled plasma, 19:2666 (RA;CZ)
Study of radiation of plasma used for steel nitride in dc and rf discharges, 19:2676 (RA;CZ)
The magnetron plasma optical diagnostics, 19:2678 (RA;CZ)
Verification of frequency scaling laws for capacitive rf discharges using two-dimensional simulations, 19:1396 (R;US)

HIGH-LEVEL RADIOACTIVE WASTES
Chemical Analysis
Tank characterization report for single-shell tank 241-U-110: Revision 1, 19:348 (R;US)

Containers
Quarterly progress report on the DOE Waste Package project at the University of Nevada, Las Vegas, July 1, 1993 through September 30, 1993, 19:254 (R;US)

Materials Handling
Underground storage tanks soft waste dislodging and conveyance, 19:230 (R;US)

Packaging
Quarterly progress report on the DOE Waste Package project at the University of Nevada, Las Vegas, July 1, 1993 through September 30, 1993, 19:254 (R;US)

Radioactive Waste Disposal
Critical comments on the US Environmental Protection Agency Standards 40 CFR 191, 19:253 (R;US)
Tank characterization report for single-shell tank 241-U-110: Revision 1, 19:348 (R;US)
Type C investigation report of crane two-blocking event at 241-SY-101 double-shell waste tank, 19:349 (R;US)

Radioactive Waste Management
Radioactive waste management - a safe solution, 19:269 (I;GB)
Technologies for destruction of long-lived radionuclides in high-level nuclear waste: Overview and requirements, 19:281 (R;US)
Waste Management Technical Manual, 19:271 (R;US)

Radioactive Waste Processing
EM International: Volume 1, 19:246 (R;US)
Effect of aluminum and silicon reactants and HIP soak time on characteristics of glass-ceramic waste forms, 19:368 (R;US)

Radioactive Waste Storage
Characterization and remediation of highly radioactive contaminated soil at Hanford, 19:460 (R;US)
Effect of viscosity on seismic response of waste storage tanks, 19:241 (R;US)
Elevated temperature effects on concrete properties, 19:356 (R;US)
Pressure resulting from an ITP waste tank deflagration, 19:376 (R;US)
Project 8980, Savannah River Plant, Separations Area, Bldg. 221-H, Acid recovery from high activity waste, 19:187 (R;US)

Radiochemical Analysis
Tank characterization report for single-shell tank 241-U-110: Revision 1, 19:348 (R;US)

Sampling
Tank characterization report for single-shell tank 241-U-110: Revision 1, 19:348 (R;US)

Separation Processes
Plasma techniques for reprocessing nuclear wastes, 19:223 (R;US)

Solidification
Solidification of high level wastes Part 1, Evaporation and calcination of Purex IWW–volatility and leachability of fission products, 19:266 (R;US)

Thermal Analysis
Tank characterization report for single-shell tank 241-U-110: Revision 1, 19:348 (R;US)

Underground Disposal
An approach to validation of thermomechanical models, 19:319 (R;US)
Elements present in leach solutions from unsaturated spent fuel tests, 19:236 (R;US)
Geologic evaluation of six nonwelded tuff sites in the vicinity of Yucca Mountain, Nevada for a surface-based test facility for the Yucca Mountain Project, 19:274 (R;US)
Post-closure performance assessment of waste packages for the Yucca Mountain Project, 19:340 (R;US)
Quarterly progress report on the DOE Waste Package project at the University of Nevada, Las Vegas, July 1, 1993 through September 30, 1993, 19:254 (R;US)
Quaternary geology and neotectonic activity along the Fish Lake Valley Fault Zone, Nevada and California, 19:288 (R;US)
State of Nevada review of Phase 1 of the INTRAVAL Project, 19:289 (R;US)
Technical basis and programmatic requirements for laboratory study of hydrological properties of the near-field environment (Yucca Mountain Project), 19:341 (R;US)
Technical basis and programmatic requirements for large block testing of coupled thermal-mechanical-hydrological-chemical processes (Yucca Mountain Project), 19:342 (R;US)
Unconfined compression experiments on Topopah Spring Member tuff at 22°C and a strain rate of 10^{-9} s^{-1}: Data report: Yucca Mountain Site Characterization Project, 19:2273 (R;US)
Word images as policy instruments: Lessons from the Yucca Mountain Controversey, 19:242 (R;US)

Vitrification
Clean option: An alternative strategy for Hanford Tank Waste Remediation: Volume 2, Detailed description of first example flowsheet, 19:295 (R;US)
Hanford Waste Vitrification Plant Quality Assurance Program description for high-level waste form development and qualification: Revision 3, Part 2, 19:347 (R;US)
Hanford Waste Vitrification Plant Quality Assurance Program description: Overview and applications: Revision 3, Part 1, 19:346 (R;US)
Interaction analysis method for the Hanford Waste Vitrification Plant, 19:355 (R;US)
Preliminary estimates of cost savings for defense high level waste vitrification options, 19:309 (R;US)

HIGH-TC SUPERCONDUCTORS
A valence-fluctuation theory of cuprate superconductivity, 19:2609 (R;US)
Heavy fermion and actinide materials: Annual progress report, January 1993–February 1994, 19:2562 (R;US)
NMR studies of oxygen-doped $La_2CuO_{4+\delta}$, 19:1102 (R;US)
Spin-polaron theory of high-$T_c$superconductivity: 2, electronic structure of the CuO_2 planes, 19:2603 (R;US)
Spin-polaron theory of high-$T_c$superconductivity: 3, Gap function and critical temperature, 19:2602 (R;US)

Compression
Disks of $YBa_2Cu_3O_7$ shocked to 10 GPa pressures, 19:1069 (R;US)

Cryogenics
Design of microchannels for cryostabilization of high temperature superconducting magnets, 19:2599 (R;US)

De Haas-Van Alphen Effect
de Haas-van Alphen measurements in $Ba_{0.6}K_{0.4}BiO_3$, 19:1075 (R;US)

Electronic Structure
Positron annihilation study of Sr Doping in $La_{2-x}Sr_xCuO_4$, 19:1104 (R;US)

Grain Boundaries
Atomic-scale structure of grain boundaries: Correlations to grain boundary properties, 19:985 (R;US)

Hysteresis
Disks of $YBa_2Cu_3O_7$ shocked to 10 GPa pressures, 19:1069 (R;US)

Impact Shock
Disks of $YBa_2Cu_3O_7$ shocked to 10 GPa pressures, 19:1069 (R;US)

Levitation
Processing of YBCO superconductors for improved levitation force, 19:2598 (R;US)

Melting
Melt-spin processing of high $T_c$oxide superconductors, 19:1089 (R;US)
The effect of correlated and point defects on the vortex lattice melting transition in single crystal $YBa_2Cu_3O_{7-\delta}$, 19:1073 (R;US)

Melting Points
The incongruent melting and melt textured solidification process of $Bi_2Sr_2CaCu_2O_8$, 19:1091 (R;US)

Phase Studies
Local structure in oxygen-doped $La_2CuO_{4+\delta}$, 19:1093 (R;US)

Phase Transformations
The effect of correlated and point defects on the vortex lattice melting transition in single crystal $YBa_2Cu_3O_{7-\delta}$, 19:1073 (R;US)

Processing
Melt-spin processing of high $T_c$oxide superconductors, 19:1089 (R;US)

Production
Processing of YBCO superconductors for improved levitation force, 19:2598 (R;US)

Schroedinger Equation
Simulating the Euclidean time Schroedinger equations using an Intel iPSC/860 hypercube: Application to the t-J model of high-$T_c$superconductivity, 19:2601 (R;US)

Solidification
The incongruent melting and melt textured solidification process of $Bi_2Sr_2CaCu_2O_8$, 19:1091 (R;US)
Specific Heat
Specific heat of $YBa_2Cu_3O_7$, 19:1098 (R;US)
Spin
Spin dynamics and implications for superconductivity: Some problems with the d-wave scenario, 19:1076 (R;US)
Splat Cooling
Melt-spin processing of high T_c oxide superconductors, 19:1089 (R;US)
Superconductivity
High-T_c superconducting superlattices, 19:1079 (R;US)
Superlattices
High-T_c superconducting superlattices, 19:1079 (R;US)
Synthesis
High oxygen pressure synthesis of new copper oxide superconductors, 19:1074 (R;US)
Temperature Dependence
Stability of an uncooled segment of a high-temperature superconductor, 19:2605 (R;US)
Testing
Test results of two high temperature superconducting sample coils, 19:2606 (R;US)
Transition Temperature
Anisotropic uniaxial pressure effects in $YBa_2Cu_3O_{7-\delta}$, 19:1077 (R;US)
Vortices
The effect of correlated and point defects on the vortex lattice melting transition in single crystal $YBa_2Cu_3O_{7-\delta}$, 19:1073 (R;US)

HIGH-VOLTAGE PULSE GENERATORS
Picosecond High Pressure Gas Switch experiment, 19:1456 (R;US)

HIGHLY ENRICHED URANIUM
Passive sensor systems for nuclear material monitoring, 19:474 (R;US)

HILACS
The Mirrortron experiment: A proof of principle test for a method of generating high transient potentials, 19:2798 (R;US)

HIPPURAN
Hippuran-^{123} I: labelling and quality control, 19:1293 (IA;BR;In Portuguese)

HIPURE PROCESS
See DESULFURIZATION

HITACHI TRAINING REACTOR
See HTR REACTOR

HL-1 TOKAMAK
Experiment and research on materials irradiated by plasma radiation, 19:2734 (R;CN;In Chinese)

HO2
See HYDROPEROXY RADICALS

HOFFMAN PROCESS
See COAL GASIFICATION

HOG FUEL
See WOOD WASTES

HOLIFIELD HEAVY ION RESEARCH FACILITY
See HHIRF ACCELERATOR

HOMOGENEOUS CATALYSIS
Fundamental studies of reactive intermediates in homogeneous catalysis, 19:1248 (R;US)

HONEYCOMB STRUCTURES
Continuum representations of cellular solids, 19:1135 (R;US)

HORIZONTAL AXIS TURBINES
'Front-end' aerodynamic control of horizontal axis wind turbines: Final report, 19:641 (R;GB)
A feasibility study into the pressure instrumentation of a full scale stall regulated rotor blade, 19:626 (RA;GB)
A wind tunnel investigation of the wake structure within small wind turbine farms, 19:640 (R;GB)
Dynamic stall on a 19 M diameter HAWT, 19:632 (RA;GB)
Load calculations on rotor blades of a wind turbine, 19:625 (RA;GB)
Mechanical noise from wind turbines, 19:617 (RA;GB)
Recent aerodynamic activities at Renewable Energy Systems, 19:631 (RA;GB)
Universal wind turbine for experiments (UNIWEX), 19:635 (RA;GB)

HOT GAS CLEANUP
Evaluation of ceramic filter material, selection for application, 19:664 (R;US)
Fluid-bed HGD PDU, 19:20 (R;US)
Initial operation of the Tidd PFBC hot gas clean up filter, 19:666 (R;US)
Integrated Low Emissions Cleanup system for multi-contaminant control, 19:663 (R;US)
Particulate characterization for PFBC filter systems, 19:665 (R;US)
Power Systems Development Facility, PFBC system perspectives, 19:11 (R;US)

HOT PLASMA
Proceedings of the 16th symposium on plasma physics and technology, 19:2651 (R;CZ)

HOT-DRY-ROCK SYSTEMS
Geothermal energy production from hot dry rock: Operational testing at the Fenton Hill, New Mexico HDR test facility, 19:604 (R;US)
The xerolithic geothermal ("hot dry rock") energy resource of the United States: An update, 19:596 (R;US)
Travel to England for a joint study with the Camborne School of Mines Associates on the European Economic Community proposed deep HDR reservoir project: Foreign trip report, April 30–May 15, 1993, 19:589 (R;US)

HOUSES
Heat recovery from exhaust air: Long term performance of residential heat recovery ventilators, 19:890 (R;SE;In Swedish)
Indoor radon measurement in the northern region of Bangladesh, 19:1919 (IA;CN)
Investigation on distribution of indoor and outdoor radon concentrations, 19:1914 (IA;CN)
Passive solar design studies. Midlands and Wales. Final design report. V. 1: Birmingham group, 19:582 (R;GB)
Passive solar design studies. Midlands and Wales. Final design report. V. 2: Welsh group, 19:583 (R;GB)
Radon-222 indoor concentration in the CIAE region of Beijing, 19:1916 (IA;CN)
Recent studies on radon–a measure of living standard, 19:1931 (IA;CN)

HT-6B TOKAMAK
The impurity transport in HT-6B tokamak, 19:2617 (R;CN)

HTGR TYPE REACTORS
Analysis of the plate-out distribution in the VAMPYR-I experiments by PLAIN code, 19:714 (R;JP)

HTO
See HEAVY WATER

HTR REACTOR
The distribution sphere model, 19:760 (R;US)

HUGENHOLTZ-PINES THEORY
See HYDROGEN

HUMAN FACTORS
A qualitative description of human error, 19:749 (R;CN)

HUMAN POPULATIONS
See also A-BOMB SURVIVORS
Derivation of cesium-137 residual radioactive material guidelines for the Peek Street site, Schenectady, New York, 19:2185 (R;US)
Hanford Environmental Dose Reconstruction Project: Quarterly report, June–August 1993, 19:386 (R;US)

HUMANS
See HUMAN POPULATIONS

HUMIC ACIDS
Studies on humic acid labelling, 19:1287 (RA;XE)

HUNTERSTON-A REACTOR
Annual report and accounts 1992-93, 19:2809 (R;GB)

HUNTERSTON-B REACTOR
Annual report and accounts 1992-93, 19:2809 (R;GB)

HYBRID ELECTRIC-POWERED VEHICLES
Electric and Hybrid Vehicles Program: Sixteenth annual report to Congress for fiscal year 1992, 19:972 (R;US)
Travel to Florence, Italy to attend the 24th International Symposium on automative technology and automation, May 20–24, 1991: Foreign trip report, May 18–26, 1991, 19:920 (R;US)

HYBRID SYSTEMS
Preliminary study concerning development of petroleum-substitution energy integration technology, 19:873 (R;JP;In Japanese)
Study on possibility of developing energy integration technology, 19:950 (R;JP;In Japanese)

HYCSOS
See CHEMICAL HEAT PUMPS

HYDRAULIC FRACTURES
Development of stimulation diagnostic technology: Annual report, January 1991–December 1992, 19:102 (R;US)

HYDRAULIC FRACTURING
Development of stimulation diagnostic technology: Annual report, January 1991–December 1992, 19:102 (R;US)

HYDRAULICS
Methods employed to speed up Cathare for simulation uses, 19:693 (R;FR)

HYDRAZOIC ACID
Spectroscopic probes of vibrationally excited molecules at chemically significant energies, 19:1241 (RA;US)

HYDRIODIC ACID
Reaction product imaging, 19:1260 (RA;US)

HYDROBROMIC ACID
Reactions of small molecular systems, 19:1274 (RA;US)

HYDROCARBONS
See also ALKENES
ALKYNES
BENZENE
POLYCYCLIC AROMATIC HYDROCARBONS
TOLUENE
A shock tube study of the reactions of the hydroxyl radical with combustion species, 19:1312 (RA;US)
CN emission in nitrogen afterglow at low temperatures: Detection of trace hydrocarbons in gas flows, 19:2539 (RA;CZ)
Kinetic data base for combustion modeling, 19:1360 (RA;US)
Soil gas waste site screening at the Savannah River Site, 19:2098 (R;US)

HYDROCHLORIC ACID
Dynamics of synchrotron VUV-induced intracluster reactions, 19:1265 (RA;US)
On-line monitoring of mercury and hydrogen chloride in hot gases from coal gasifiers, 19:8 (R;US)
Optical sensor development for MCFCs: HCl detection through wavelength modulation diode laser absorption spectroscopy, 19:884 (R;US)
Theoretical studies of chemical reaction dynamics, 19:1353 (RA;US)

HYDROCYANIC ACID
Some comparisons of model predictions to experimental data on gas-phase reactions of NH_3 and HCN, 19:1305 (R;FI)
Theoretical studies of the dynamics of chemical reactions, 19:1363 (RA;US)

HYDRODYNAMICS
A geometric weighted elliptic grid regeneration method for 3D unstructured ALE hydrodynamics, 19:2324 (R;US)
Coupling of smooth particle hydrodynamics with the finite element method, 19:2875 (R;US)
Smoothed-particle hydrodynamics and nonequilibrium molecular dynamics, 19:2323 (R;US)

HYDROELECTRIC POWER
Model documentation report: Short-Term Hydroelectric Generation Model, 19:550 (R;US)

HYDROELECTRICITY
See HYDROELECTRIC POWER

HYDROFLUORIC ACID
Low energy ion-molecule reactions, 19:1318 (RA;US)

HYDROGEN
Chemical Reaction Kinetics
Combustion kinetics and reaction pathways, 19:1334 (RA;US)
Elementary reaction rate measurements at high temperatures by tunable-laser flash-absorption, 19:1327 (RA;US)
Kinetic and mechanistic studies of free-radical reactions in combustion, 19:1361 (RA;US)
Probing flame chemistry with MBMS, theory, and modeling, 19:1366 (RA;US)
Theoretical studies of chemical reaction dynamics, 19:1353 (RA;US)

Chemical Reactions
Crossed-beam studies of the dynamics of radical reactions, 19:1341 (RA;US)
Single-collision studies of energy transfer and chemical reaction, 19:1362 (RA;US)
Theoretical studies of combustion dynamics, 19:1308 (RA;US)
Theoretical studies of potential energy surfaces, 19:1326 (RA;US)
Theoretical studies of the dynamics of chemical reactions, 19:1363 (RA;US)

Collisions
Crossed-beam studies of the dynamics of radical reactions, 19:1341 (RA;US)

Detection
Generic microelectronic smart sensor platform for detection of toxic, hazardous, and flammable gases, 19:1220 (R;US)
Robust, Wide-Range Hydrogen Sensor for use in commercial, space, and government applications, 19:1829 (R;US)

Dissociation
Atomic probes of surface structure and dynamics: Technical progress report, September 15, 1991–September 14, 1992, 19:1156 (R;US)

Electric Fields
The three-dimensional hydrogen atom in crossed magnetic and electric fields, 19:2292 (R;RU)

Electron-Molecule Collisions
Non-adiabatic effects in low-energy electron-molecule scattering, 19:2556 (R;US)

Energy Transfer
Time-resolved FTIR emission studies of laser photofragmentation and radical reactions, 19:1338 (RA;US)

Magnetic Fields
The three-dimensional hydrogen atom in crossed magnetic and electric fields, 19:2292 (R;RU)

Mass Transfer
A novel method for determination of transport parameters of H_2 and O_2 in PEMFCs, 19:880 (R;US)

Materials Recovery
Plasma-chemical waste treatment of acid gases, 19:924 (R;US)

Mathematical Models
Theoretical studies of molecular interactions, 19:1152 (RA;US)

Phase Diagrams
Theoretical phase diagrams for solid H_2, 19:1140 (R;US)

Photolysis
Reaction product imaging, 19:1260 (RA;US)

Photosynthesis
Feasibility study on a CO2 global recycling system using natural energy, 19:575 (R;JP;In Japanese)

Pyrolysis
Atomic probes of surface structure and dynamics: Technical progress report, September 15, 1991–September 14, 1992, 19:1156 (R;US)

Separation Processes
Development of an electrochemical hydrogen separator, 19:1159 (R;US)
High temperature size selective membranes, 19:1162 (R;US)

HYDROGEN 1 MINUS BEAMS
Machine studies at the Los Alamos Proton Storage Ring, 19:1593 (R;US)

HYDROGEN 1 TARGET
Tensor analyzing power of nuclear fragmentation of relativistic deuterons with proton emission at non-zero angles, 19:2499 (R;RU)

HYDROGEN 2
See DEUTERIUM
HYDROGEN 3
See TRITIUM
HYDROGEN BROMIDES
See HYDROBROMIC ACID
HYDROGEN CHLORIDES
See HYDROCHLORIC ACID
HYDROGEN CYANIDES
See HYDROCYANIC ACID
HYDROGEN FLUORIDES
See HYDROFLUORIC ACID
HYDROGEN HYDROXIDES
See WATER
HYDROGEN IODIDES
See HYDRIODIC ACID
HYDROGEN IONS
See also HYDROGEN IONS 1 MINUS
Dissociative recombination of stored and phase-spaced cooled molecular ions in CRYRING, 19:2551 (R;US)

Second-generation PFBC systems research and development: Phase 2, Best efficiency approach in light of current data, 19:646 (R;US)

LOW DOSE IRRADIATION
What can be learned from epidemiologic studies of persons exposed to low doses of radiation?, 19:2234 (R;US)

LOW ENERGY ELECTRON DIFFRACTION
See ELECTRON DIFFRACTION

LOW-LEVEL RADIOACTIVE WASTES
Compacting
The volume reduction of low level solid radioactive waste using a mobile supercompactor at Winfrith Technology Centre, 19:232 (R;GB)
Ground Disposal
Second annual report of the Environmental Restoration Monitoring and Assessment Program at Oak Ridge National Laboratory, 19:432 (R;US)
Grouting
Clean option: An alternative strategy for Hanford Tank Waste Remediation: Volume 2, Detailed description of first example flowsheet, 19:295 (R;US)
Estimating emissions from grout pouring operations, 19:310 (R;US)
Radioactive Waste Disposal
Environmental assessment for the decommissioning and decontamination of contaminated facilities at the Laboratory for Energy-Related Health Research University of California, Davis, 19:409 (R;US)
Hydrologic studies of multilayered landfill covers for closure of waste landfills at Los Alamos, New Mexico, 19:278 (R;US)
Radioactive waste management - a safe solution, 19:269 (I;GB)
The Mixed Waste Management Facility closure and expansion at the Savannah River Site, 19:373 (R;US)
Radioactive Waste Management
Waste Management Technical Manual, 19:271 (R;US)
Radioactive Waste Processing
Entry/Exit Port testing, test report, 19:363 (R;US)
Mixed debris treatment at the Idaho National Engineering Laboratory (INEL), 19:369 (R;US)
Technical area status report for low-level mixed waste final waste forms: Volume 1, 19:252 (R;US)
The volume reduction of low level solid radioactive waste using a mobile supercompactor at Winfrith Technology Centre, 19:232 (R;GB)
Radioactive Waste Storage
Beneficially reusing LLRW the Savannah River Site Stainless Steel Program, 19:1404 (R;US)
Detailed leak detection test plan and schedule for the Oak Ridge National Laboratory LLLW active pipelines: Environmental Restoration and Waste Management Programs, 19:227 (R;US)
Risk characterization data manual for Category D inactive liquid low-level waste tank systems at Oak Ridge National Laboratory, Oak Ridge, Tennessee, 19:416 (R;US)
Regulations
Mixed debris treatment at the Idaho National Engineering Laboratory (INEL), 19:369 (R;US)
Solidification
Characterization of phosphate/sulfate waste grout cores, 19:436 (R;US)
Transport Regulations
Low Specific Activity materials concepts are being reevaluated, 19:226 (R;US)
Underground Disposal
Characterization of phosphate/sulfate waste grout cores, 19:436 (R;US)
Viscosity
Project 8980: Savannah River Plant 242-F – External waste evaporation facilities WR 50020 viscosity of concentrated wastes, 19:336 (R;US)
Waste Management
Environmental restoration/waste management-applied technology semiannual report, January–June 1992: Volume 1, No. 1, 19:451 (R;US)
Waste Transportation
A radiological and chemical investigation of the 7500 Area Contamination Site at Oak Ridge National Laboratory, Oak Ridge, Tennessee, 19:2077 (R;US)

LOWER HYBRID CURRENT DRIVE
Analysis of density limit and efficiency in lower hybrid current drive, 19:2619 (R;CN)
Dependence of particle confinement on plasma density and plasma position in LHCD discharges in CASTOR tokamak, 19:2668 (RA;CZ)
Diffusion of alpha particles induced by LHW, 19:2652 (RA;CZ)
Interaction of the slow lower hybrid waves radiated from a waveguide structure and the ponderomotive effects, 19:2654 (RA;CZ)
Mapping of the edge plasma in CASTOR tokamak, 19:2671 (RA;CZ)
On the role of short wave-length part of the spectrum in the LHW absorption by alpha particles (Lower hybrid waves.), 19:2653 (RA;CZ)
Role of runaway electrons in LHCD regimes with improved confinement on CASTOR tokamak, 19:2670 (RA;CZ)

LP-GAS
See LIQUEFIED PETROLEUM GASES

LUNGS
Analysis of human hair and lung samples from contaminated and non-contaminated regions of Byelorussia using the SSNTD technique, 19:1211 (IA;CN)

LWGR TYPE REACTORS
See also CHERNOBYLSK-4 REACTOR
N-REACTOR
Flux stability and power control in the Soviet RBMK-1000 reactors, 19:754 (R;US)

LWR TYPE REACTORS
See WATER COOLED REACTORS

LYMPHOCYTES
Restricted expression of recombination activating gene (RAG-1) in mouse lymphoid tissues, 19:2235 (R;JP)

LYMPHOID CELLS
See LYMPHOCYTES

M

MA 754
See NICKEL BASE ALLOYS

MA 956
See IRON BASE ALLOYS

MACHINE PARTS
Energy conservation by developing a self-rotation type air blowing nozzle, 19:1380 (IA;JP)

MAGMA
Bulk Density
Roles of volatile components in magma ascent and eruption.: Example of an Izu-Oshima Island volcano, 19:2257 (IA;JP;In Japanese)
Comminution
Mechanism for magma vapor explosion, 19:2258 (IA;JP;In Japanese)
Dimensions
Estimation of size of magma chambers according to thickness of contact metamorphic aureole, 19:592 (IA;JP;In Japanese)
Eruption
Roles of volatile components in magma ascent and eruption.: Example of an Izu-Oshima Island volcano, 19:2257 (IA;JP;In Japanese)
Explosions
Mechanism for magma vapor explosion, 19:2258 (IA;JP;In Japanese)
Feldspars
Generation and migration of felsitic magma.: Magmatrap, 19:591 (IA;JP;In Japanese)
Geologic Models
Magma as seen from hot water convection systems, 19:593 (IA;JP;In Japanese)
Geothermal Fields
Magma as seen from hot water convection systems, 19:593 (IA;JP;In Japanese)
Geothermal Resources
Magma as seen from hot water convection systems, 19:593 (IA;JP;In Japanese)
Heat Sources
Generation and migration of felsitic magma.: Magmatrap, 19:591 (IA;JP;In Japanese)
Lakes
Roles of volatile components in magma ascent and eruption.: Example of an Izu-Oshima Island volcano, 19:2257 (IA;JP;In Japanese)
Lava
Mechanism for magma vapor explosion, 19:2258 (IA;JP;In Japanese)
Roles of volatile components in magma ascent and eruption.: Example of an Izu-Oshima Island volcano, 19:2257 (IA;JP;In Japanese)
Mathematical Models
Estimation of size of magma chambers according to thickness of contact metamorphic aureole, 19:592 (IA;JP;In Japanese)
Magma as seen from hot water convection systems, 19:593 (IA;JP;In Japanese)
Migration
Generation and migration of felsitic magma.: Magmatrap, 19:591 (IA;JP;In Japanese)
Origin
Generation and migration of felsitic magma.: Magmatrap, 19:591 (IA;JP;In Japanese)
Sprays
Roles of volatile components in magma ascent and eruption.: Example of an Izu-Oshima Island volcano, 19:2257 (IA;JP;In Japanese)
Thickness
Estimation of size of magma chambers according to thickness of contact metamorphic aureole, 19:592 (IA;JP;In Japanese)
Traps
Roles of volatile components in magma ascent and eruption.: Example of an Izu-Oshima Island volcano, 19:2257 (IA;JP;In Japanese)
Upwelling
Roles of volatile components in magma ascent and eruption.: Example of an Izu-Oshima Island volcano, 19:2257 (IA;JP;In Japanese)
MAGMA SYSTEMS
Interim report on 1991/1992 research and development results under the Sunshine Project.: Study on technologies to evaluate national geothermal resources, 19:590 (I;JP;In Japanese)
Magma reservoir as seen from geothermal system modelling.: Hohi, Sengan, and Kurikoma geothermal areas as examples, 19:594 (IA;JP;In Japanese)
MAGMATISM
Magma behavior and eruption as seen from earthquake.: Towards elucidation of eruptive mechanism of volcano in White Island, 19:2256 (IA;JP;In Japanese)
MAGNESIUM
Baseline risk assessment of groundwater contamination at the uranium mill tailings site near Shiprock, New Mexico: Draft, 19:401 (R;US)
First-principles pressure-temperature phase diagrams in metals, 19:1056 (R;US)
MAGNESIUM 24 BEAMS
A facility for liquid-phase radiation experiments on heavy ion beams, 19:1539 (R;RU)
MAGNESIUM ALLOYS
The effect of electric discharge machined notches on the fracture toughness of several structural alloys, 19:1035 (R;US)
MAGNESIUM BORIDES
Development of Mg B_4 O_7:Dy thermoluminescent solid dosemeter for using on the thermal neutron dosimetry, 19:1627 (IA;BR;In Portuguese)
MAGNESIUM OXIDES
Low temperature diffusion of hydrogenic species in oxide crystals: Radiation induced diffusion, 19:1081 (R;US)
MAGNET COILS
Special remote tooling developed and utilized to tighten TFTR TF coil casing bolts, 19:2779 (R;US)
MAGNETIC BREMSSTRAHLUNG
See SYNCHROTRON RADIATION
MAGNETIC COILS
See MAGNET COILS
MAGNETIC DIPOLES
The projectile-fragment separator COMBAS and planned experiments, 19:1536 (IA;UA)
MAGNETIC FIELDS
Anomalous behaviour of the diamagnetic profile near the superconducting niobium boundary with vacuum, 19:2524 (R;RU;In Russian)
Effects of magnetic field perturbations in the ATF torsatron, 19:2622 (R;US)
The use of harmonics in 3-D magnetic fields, 19:1497 (R;US)
MAGNETIC INSULATION
Magnetic insulation of secondary electrons in plasma source ion implantation, 19:2302 (R;US)
MAGNETIC LEVITATED TRAINS
See LEVITATED TRAINS
MAGNETIC PROBES
Determination of the plasma column shape in the Tokamak Novillo cross section by magnetic probes., 19:2686 (I;MX;In Spanish)
MAGNETIC RESONANCE
See also ELECTRON SPIN RESONANCE
Mechanical design parameters for detection of nuclear signals by magnetic resonance force microscopy, 19:2157 (R;US)
MAGNETIC SPECTROMETERS
Analysis of data in experimental investigation of the decay $K^+ \rightarrow \pi^0 e^+ \nu$ on the Hyperon facility, 19:1780 (R;RU;In Russian)
The spectrometric complex HYPERON for investigation of rare K-meson decays, 19:1793 (R;RU;In Russian)
Trigger for decays of B-mesons produced at 20 TeV, 19:1773 (R;RU)
MAGNETOMETERS
The computer-aided system for the high resolution SQUID-magnetometer, 19:1824 (R;RU;In Russian)
MAGNETOSPHERE
See EARTH MAGNETOSPHERE
MAGNETS
See also ELECTROMAGNETS
PERMANENT MAGNETS
Design and analysis of high-field quasi-continuous magnets, 19:2311 (R;US)
Design of a 400 MW power supply for a 60 T pulsed magnet, 19:1381 (R;US)

Developments in materials for high-field magnets, 19:986 (R;US)
Intelligent CAE system of CYCLONE type cyclotron main magnet and its applications, 19:1471 (R;CN)
Performance of quadrupole and sextupole magnets for the Advanced Photon Source storage ring, 19:1580 (R;US)
Prototype tests and description of a 60 tesla quasi-continuous magnet, 19:1383 (R;US)
The magnet measurement facility for the Advanced Photon Source, 19:1582 (R;US)
Three dimensional field computation software package DE3D and its applications, 19:1472 (R;CN)

MALAYA
See MALAYSIA

MALAYSIA
Basic investigation on feasibility of verification researches for new energy technologies in ASEAN countries (Thailand and Indonesia). Part 4, 19:853 (R;JP;In Japanese)

MALIGNANCIES
See NEOPLASMS

MAMMARY GLANDS
Genetics and molecular biology of breast cancer, 19:2163 (R;US)
Quality evaluation of mammography systems: identification of the best region by the transfer function method, 19:2154 (IA;BR;In Portuguese)

MAN
See also PERSONNEL
What can be learned from epidemiologic studies of persons exposed to low doses of radiation?, 19:2234 (R;US)

MAN-MACHINE SYSTEMS
Automatic scanning and measuring using POLLY, 19:1601 (R;US)

MANAGEMENT
See also DATA BASE MANAGEMENT
NUCLEAR MATERIALS MANAGEMENT
WASTE MANAGEMENT
Inspection of the Department of Energy's procedures for administering contractors' executive employees' compensation, 19:2799 (R;US)

MANGANESE OXIDES
Hot coal gas desulfurization with manganese-based sorbents, 19:17 (R;US)
Studies on inorganic exchangers : hydrous manganese (II) oxide, 19:1231 (R;IN)

MANIPULATORS
Active damping of oscillations in a long compliant manipulator link, 19:1386 (R;US)
Automatic system for evaluation of ionizing field, 19:1622 (IA;BR;In Portuguese)
Parametric design studies of long-reach manipulators, 19:1374 (R;US)
Telerobotics with whole arm collision avoidance, 19:1400 (R;US)

MANOMETERS
See PRESSURE GAGES

MANUFACTURING
Environmental and industrial applications of pulsed power systems, 19:508 (R;US)
NREL photovoltaic subcontract reports: Abstracts and document control information, 1 August 1992–31 July 1993, 19:556 (R;US)

MANUFACTURING FACILITIES
See INDUSTRIAL PLANTS

MANURES
Large-scale manure processing with biogas generation, 19:533 (R;FR;In Dutch, English)

MAPPING
See also TOPOLOGICAL MAPPING
A combined GIS-HEC procedure for flood hazard evaluation, 19:826 (R;US)

MAPPING (TOPOLOGICAL)

MICRORADIOGRAPHY
The use of radiographic techniques for studying elemental distributions in natural and technological objects, 19:2032 (IA;CN)
Track radiography of heavy elements in minerals, 19:1214 (R;RU)
MICROSCOPES
Version 3.0 'ATOM' software with built-in motorized stage control for optical microscopy analysis of nuclear tracks, 19:2851 (IA;CN)
MICROSCOPY
Orientation Imaging Microscopy: New possibilities for microstructural investigations using automated BKD analysis, 19:1218 (R;US)
Quantitative analysis of Scanning Tunneling Microscopy images for surface structure determination: Sulfur on Re(0001), 19:1034 (R;US)
MICROSPHERES
Thin-wall hollow ceramic spheres from slurries: Quarterly project status report, 1 January–31 March 1991, 19:1082 (R;US)
MICROSTRUCTURE
See also GRAIN BOUNDARIES
GRAIN ORIENTATION
Orientation Imaging Microscopy: New possibilities for microstructural investigations using automated BKD analysis, 19:1218 (R;US)
MICROWAVE AMPLIFIERS
CARM and harmonic gyro-amplifier experiments at 17 GHz, 19:2735 (R;US)
Investigation of a 140 GHz gryo-backward wave oscillator and a 95 GHz gyro-traveling wave, 19:1439 (R;US)
Mean time between failures (MTBF) and availability of the Gyrotron system used on the Microwave Tokamak Experiment at Lawrence Livermore National Laboratory, 19:2795 (R;US)
MICROWAVE DISCHARGES
See HIGH-FREQUENCY DISCHARGES
MICROWAVE EQUIPMENT
See also MICROWAVE AMPLIFIERS
Operational upgrades to the DIII-D 60 GHz electron cyclotron resonant heating system, 19:2752 (R;US)
MICROWAVE HEATING
An assessment of the cost of microwave sintering ceramic tiles for armor applications: Phase 1, 19:1100 (R;US)
MID-ATLANTIC REGION
See USA
MIDWEST REGION
See USA
MIGRATION (RADIONUCLIDE)
See RADIONUCLIDE MIGRATION
MILITARY EQUIPMENT

AR-70-XX, management of computer resources in Battlefield Automated Systems, analysis: Final report for period 15 January 1988–15 June 1988, 19:1834 (R;US)
Distributed processing using Oracle7 and SQL*Net v2: An implementation story, 19:2885 (R;US)
MILITARY FACILITIES
Fort Drum integrated resource assessment: Volume 1, Executive summary, 19:960 (R;US)
Griffiss Air Force Base omtegrated respirce assessment: Volume 3, Electric resource assessment, 19:910 (R;US)
Preliminary assessment report for Army Aviation Support Facility 2, Installation 25075, Westover Air Force Base, Chicopee, Massachusetts: Installation Restoration Program, 19:2060 (R;US)
Preliminary assessment report for Bee Caves Armory (former Nike BG-80 Fire Control Facility), Installation 48055, Austin, Texas: Installation Restoration Program, 19:2059 (R;US)
Preliminary assessment report for Camp Swift Military Reservation, Installation 48070, Bastrop County, Texas: Installation Restoration Program, 19:2063 (R;US)
Preliminary assessment report for Florence Military Reservation, Installation 04080, Florence, Arizona: Installation Restoration Program, 19:2068 (R;US)
Preliminary assessment report for Fort Custer Training Center, Installation 26035, Augusta, Michigan: Installation Restoration Program, 19:2065 (R;US)
Preliminary assessment report for Fort Jacob F. Wolters, Installation 48555, Mineral Wells, Texas: Installation Restoration Program, 19:2067 (R;US)
Preliminary assessment report for National Guard Facility, Installation 25255, Rehoboth, Massachusetts: Installation Restoration Program, 19:2061 (R;US)
Preliminary assessment report for Redmond Army National Guard Facility, Installation 53120, Redmond, Washington: Installation Restoration Program, 19:2058 (R;US)
Preliminary assessment report for Virginia Army National Guard Army Aviation Support Facility, Richmond International Airport, Installation 51230, Sandston, Virginia, 19:2066 (R;US)
Preliminary assessment report for Waiawa Gulch, Installation 15080, Pearl City, Oahu, Hawaii: Installation Restoration Program, 19:2062 (R;US)
Preliminary assessment report for Wayland Army National Guard Armory (former Boston Defense Area Nike Battery 73), Installation 23295, Wayland, Massachusetts: Installation Restoration Program, 19:2064 (R;US)
Robins Air Force Base Integrated Resource Assessment: Volume 2, Baseline Detail, 19:961 (R;US)
MILITARY STRATEGY
CMS Preprocessing Subsystem user's guide: Software version 1.2, 19:2870 (R;US)
MILK
Hanford Environmental Dose Reconstruction Project: Quarterly report, June–August 1993, 19:386 (R;US)
MILK SUGAR
See LACTOSE
MILL TAILINGS
Baseline risk assessment for groundwater contamination at the uranium mill tailings site near Monument Valley, Arizona: Draft, 19:400 (R;US)

Baseline risk assessment of groundwater contamination at the uranium mill tailings site near Shiprock, New Mexico: Draft, 19:401 (R;US)
Environmental assessment of remedial action at the Maybell uranium mill tailings site near Maybell, Colorado, 19:396 (R;US)
Environmental assessment of remedial action at the Slick Rock uranium mill tailings sites Slick Rock, Colorado: Draft, 19:407 (R;US)
Guidance document for preparing water sampling and analysis plans for UMTRA sites: Final [report], 19:405 (R;US)
Licensing plan for UMTRA project disposal sites: Final [report], 19:397 (R;US)
Long-term surveillance plan for the Lowman, Idaho, disposal site, 19:245 (R;US)
Miscellaneous radioactive materials detected during uranium mill tailings surveys, 19:435 (R;US)
Site-specific analysis of radiological and physical parameters for cobbly soils at the Gunnison, Colorado, processing site, 19:402 (R;US)
Technical assistance contractor Management Plan: Final [report], 19:399 (R;US)

MINE-MOUTH GENERATING PLANTS
See FOSSIL-FUEL POWER PLANTS

MINERAL ACIDS
See INORGANIC ACIDS

MINERAL WASTES
Environmental restoration waste materials co-disposal, 19:353 (R;US)

MINERALS
Analysis of cryolite mineral content by nuclear exploration technique, 19:2009 (I;BR)
Carajas Mineral Province evolution based in new geochronological data, 19:1182 (I;BR;In Portuguese)
Comparison of a new approach for the study of thermal history of minerals with more standard semi-empirical procedures, 19:2021 (IA;CN)
Detection of hydrothermal change zone by TM images analysis and spectroradiometric measures, 19:2008 (I;BR;In Portuguese)
Injury experience in metallic mineral mining, 1991, 19:2247 (R;US)
Mineralogical characteristics of the silica polymorphs in relation to their biological activities, 19:2262 (R;US)
Studies of clays and clay minerals using x-ray powder diffraction and the Rietveld method, 19:1217 (R;US)
The Brazilian thermo-tectonic poly phase synchronism from Patos-Serido and Campina Grande (Borborema Province) shearing systems to the knowledge of $^{40}Ar/^{39}Ar$ dating of mono-crystal with laser probe, 19:1180 (I;BR;In Portuguese)
Uranium content and age determination of various minerals of Iran, 19:1206 (IA;CN)

MINIATURE NEUTRON SOURCE REACTOR
See MNS REACTOR

MINING
In plant partial noise enclosures for the mining industry, 19:2246 (R;US)
Injury experience in metallic mineral mining, 1991, 19:2247 (R;US)
Injury experience in sand and gravel mining, 1991, 19:2248 (R;US)
Injury experience in stone mining, 1991: Information report, 19:163 (R;US)

MIRRORS
See also LASER MIRRORS
Inspection of the diamond-turned surfaces used for mounting an array of eight x-ray reflection gratings, 19:1831 (R;US)

MISSOURI
Aquifer characterization and groundwater modeling in support of remedial actions at the Weldon Spring Site, 19:392 (R;US)

MIXER-SETTLERS
Study on hydrodynamics and mass transfer of the critically safe multistage mixer-settler, 19:171 (R;CN;In Chinese)

MIXERS
Mathematical modelling of fluid mixing processes: A literature review, 19:1412 (R;FI;In Swedish)
Numerical simulation of the flow pattern generated by a Rushton turbine in a stirred tank, 19:1413 (R;FI;In Swedish)

MIXING
Mathematical modelling of fluid mixing processes: A literature review, 19:1412 (R;FI;In Swedish)

MM-0011
See NICKEL BASE ALLOYS

MNS REACTOR
Measurement of energy spectrum parameter in irradiation tube of prototype miniature neutron source reactor (MNSR) with SSNTD, 19:1752 (IA;CN)

MODELS (FLOW)
See FLOW MODELS

MODELS (MATHEMATICAL)
See MATHEMATICAL MODELS

MODELS (PARTICLE)

MODELS (STATISTICAL)
See STATISTICAL MODELS

MODERATORS
Design of a target and moderator at the Los Alamos Spallation Radiation Effects Facility (LASREF) as a neutron source for fusion reactor materials development, 19:2768 (R;US)

MODES (OSCILLATION)
See OSCILLATION MODES

MOISTURE
A field evaluation of remote sensor measurements of wind, temperature, and moisture for ARM integrated sounding system research, 19:1815 (R;US)
Reduction of coke oven heat consumption by means of coal moisture control plant (CMC) for No.1-3 coke-oven batteries, 19:23 (IA;JP)

MOISTURE GAGES
Indirect gas chromatographic measurement of water for process streams, 19:1822 (R;US)

MOLDAVITES
See TEKTITES

MOLECULAR BIOLOGY
Biology Division progress report, October 1, 1991–September 30, 1993, 19:2139 (R;US)

MOLECULAR CLUSTERS
Combustion-related studies using weakly-bonded complexes, 19:1259 (RA;US)
Studies of ground-state dynamics in isolated species by ionization-detected stimulated Raman techniques, 19:1236 (RA;US)

MOLECULAR ORBITAL MODEL
See MOLECULES

MOLECULES
Microscopic and macroscopic dynamics, 19:2321 (R;US)

MOLTEN CARBONATE FUEL CELLS
Advanced research and technology development of MCFCs, 19:882 (R;US)
Cathode materials for the molten carbonate fuel cell, 19:878 (R;US)
Electrical conductivity of electrolytic matrix for molten carbonate fuel cell, 19:1086 (R;IT)
Molten carbonate fuel cell product development test, 19:883 (R;US)
Optical sensor development for MCFCs: HCl detection through wavelength modulation diode laser absorption spectroscopy, 19:884 (R;US)
Optimisation of NiO cathode performance and endurance in molten carbonate fuel cells, 19:888 (R;FR)
Study on interfacial characteristics of porous nickel electrode for molten carbonate fuel cell by means of electrochemical impedance spectroscopy, 19:887 (R;IT)

MOLTEN METAL-WATER REACTIONS
Evaluation of specific heat and temperature of thermite used in melt coolant interaction test in ALPHA program, 19:679 (R;JP;In Japanese)
MOLTEN SALT COOLANTS
See MOLTEN SALTS
MOLTEN SALT REACTORS
Dismantled weapons fuel burning in molten salt reactors, 19:713 (R;US)
MOLTEN SALTS
Evaluation of in-plant neutron coincidence counters for the measurement of molten salt extraction residues, 19:279 (R;US)
MOLYBDENUM
First-principles pressure-temperature phase diagrams in metals, 19:1056 (R;US)
Interface science of controlled metal/metal and metal/ceramic interfaces prepared using ultrahigh vacuum diffusion bonding, 19:1058 (R;US)
Surface structure determinations of ordered sulfur overlayers on Mo(100) and Re(0001) by low-energy electron diffraction intensity analysis, 19:1033 (R;US)
MOLYBDENUM 100
First results of a search for double beta decay of ^{100}Mo with the NEMO 2 detector, 19:2440 (R;US)
MOLYBDENUM ALLOYS
See also ALLOY-NI50CR22FE18MO9
The effect of electric discharge machined notches on the fracture toughness of several structural alloys, 19:1035 (R;US)
The effect of microstructural evolution on superplasticity in Ni_3Si(V,Mo), 19:1105 (R;US)
The history of development of molybdenum alloys for structural applications, 19:1062 (R;US)
MOLYBDENUM SILICIDES
Evaluation of $A_5Si_3Z_x$ intermetallics for use as high temperature structural materials, 19:1088 (R;US)
MOLYBDENUM SULFIDES
Hollow fiber catalytic membranes, 19:14 (R;US)
MONGOLIAN PEOPLES REPUBLIC
Basic investigation on feasibility of verification researches for new energy technologies in Asian developing countries (Nepal, Mongolia and Bhutan), 19:851 (R;JP;In Japanese)
MONITORING (RADIATION)
See RADIATION MONITORING
MONITORS
See also AIR POLLUTION MONITORS
BEAM MONITORS
RADIATION MONITORS
Generic microelectronic smart sensor platform for detection of toxic, hazardous, and flammable gases, 19:1220 (R;US)
MONITORS (AIR POLLUTION)

MONOCARBOXYLIC ACIDS
See also FORMIC ACID
Influence of revascularization on myocardial perfusion, metabolism and function evaluated with I-123-IPPA, 19:2141 (R;US)
MONOCHROMATORS
The performance of photoemission beamline 6.1, 19:1524 (R;GB)
Variable angle asymmetric cut monochromator, 19:1519 (R;US)
MONOCLONAL ANTIBODIES
Detection of plasma granule membrane protein (GMP-140) using radiolabelled monoclonal antibodies in thrombotic diseases, 19:2168 (R;CN)
MONOCRYSTALS
Inertial Confinement Fusion Quarterly Report: April–June 1993, Volume 3, Number 3, 19:2797 (R;US)
MOON
Lunar exploration rover program developments, 19:1390 (R;US)
MOS TRANSISTORS
Fabrication of sub-40-nm p-n junctions for 0.18 μm MOS device applications using a cluster-tool-compatible, nanosecond thermal doping technique, 19:1459 (R;US)
Simple method to estimate MOS oxide-trap, interface-trap, and border-trap densities, 19:2569 (R;US)
MOUNTAINS
See also YUCCA MOUNTAIN
Ending time of intensive geologic alternating action (IGAA) in Taowan group of Qinling mountains, 19:2045 (IA;CN)
MULTICHARGED IONS
Electron spectroscopic studies of the neutralization of slow multicharged ions during interactions with a metal surface, 19:2590 (R;US)
Relativistic configuration interaction calculation of the correlation energies of highly-charged ions, 19:2534 (R;US)
Semiempirical studies of atomic structure: Progress report, 1 July 1991–1 October 1993, 19:2530 (R;US)
MULTIPHASE FLOW
[Particle dispersion by order motion in mixing layers], 19:1421 (R;US)
MULTIPLICATION FACTORS
Experiment of neutron multiplication in beryllium, 19:1613 (R;CN)
MULTIPOLES
See also QUADRUPOLES
Defining the systematic and random multipole errors for Main Injector Tracking, 19:1529 (R;US)
MULTIPROCESSING
See PARALLEL PROCESSING
MULTIPROCESSORS
See ARRAY PROCESSORS
MULTIVARIATE ANALYSIS
A neural network for non linear principal component analysis, 19:2821 (R;FI)
MULTIWIRE DRIFT CHAMBERS
See DRIFT CHAMBERS
MULTIWIRE PROPORTIONAL CHAMBERS
See also DRIFT CHAMBERS
A two-dimensional detector with delay line readout for slow neutron fields measurements, 19:1777 (R;RU)
Circular small-size beam chamber, 19:1787 (R;RU;In Russian)
Indiana University High Energy Physics Group, Task C: Technical progress report, November 1, 1992–October 31, 1993, 19:1614 (R;US)
Two-coordinate multiwire propoertional chamber for SINDRUM spectrometer, 19:1791 (R;RU;In Russian)
Two-dimensional multiwire detector of high resolution for x-ray diffractometer, 19:1771 (R;RU;In Russian)
MUNICIPAL WASTES
Field evaluation of natural gas and dry sorbent injection for MWC emissions control, 19:958 (R;US)
Integrated solid waste management in Japan, 19:957 (R;US)
Reduced gas pressure operation of sludge digesters: Expanded studies: Final report, 19:959 (R;US)
Waste-to-energy in the United States: Socioeconomic factors and the decision-making process, 19:963 (R;US)
MUNITIONS
See ORDNANCE
MUON BEAMS
The separated surface muon beam of the LNP JINR phasotron: The forming scheme and parameters of the beam, 19:1494 (R;RU;In Russian)
The separated surface muon beam of the LNP JINR phasotron: The measure and treatment procedure of the beam two-dimensional amplitude-time spectra (Laboratory of Nuclear Problems (LNP).), 19:1495 (R;RU;In Russian)
MUON DETECTION
The GEM Detector projective alignment simulation system, 19:1806 (R;US)
MUON-NUCLEON INTERACTIONS
See also MUON-PROTON INTERACTIONS
Jet production in muon-proton and muon-nuclei scattering at Fermilab-E665, 19:2386 (R;US)
Present status of parton distributions, 19:2416 (R;GB)

MUON-PROTON INTERACTIONS
Jet production in muon-proton and muon-nuclei scattering at Fermilab-E665, 19:2386 (R;US)
Toward a QCD analysis of jet rates in deep-inelastic Muon-Proton scattering, 19:2385 (R;US)

MUONIC ATOMS
Muon transfer rates in collisions of hydrogen isotope mesic atoms on 'bare' nuclei. Multichannel adiabatic approach, 19:2560 (R;RU)
Project of the experiment to test the hypothesis on existence of 'white' and 'black' $p\mu$-atoms, 19:2559 (R;RU)

MUONIC MOLECULES
Investigation of nuclear fusion reactions in charge-nonsymmetric muonic molecules, 19:2691 (R;RU)

MUONS
See also COSMIC MUONS
A measurement of muon fluences associated with the Fermilab Proton Center charged hyperon beam, 19:1532 (R;US)
Limits on supersymmetry masses from the anomalous magnetic moment of leptons, 19:2351 (R;NO)

MUSCOVITE
Registration threshold for tracks of ^{40}Ar ions in muscovite mica, 19:1705 (IA;CN)

MUSCULAMINE
See SPERMINE

MUTATIONS
See also CHROMOSOMAL ABERRATIONS
GENE MUTATIONS
Effect of the mutation of recB21 of Escherichia coli on indirect recombinogenesis of bacteriophage lambda., 19:2213 (I;MX;In Spanish)

MWPC
See MULTIWIRE PROPORTIONAL CHAMBERS

MYOCARDIUM
Influence of revascularization on myocardial perfusion, metabolism and function evaluated with I-123-IPPA, 19:2141 (R;US)

NATURAL GAS
Calorific Value
Determination of the gross calorific value of natural gas: Results of a BCR intercomparison, 19:160 (R;FR)

Combustion
DOE/NARUC - National conference on natural gas use, 19:137 (RA;US)
Pressurized burner test facility, 19:159 (R;US)

Compiled Data
Mexican demand for US natural gas, 19:103 (R;US)
Winter fuels report, week ending October 15, 1993 (Contains glossary), 19:86 (R;US)

Compression
Gas turbines for natural gas transport and storage, 19:157 (R;IT;In Italian)

Cost
Designing purchased gas adjustment clauses to provide for incentive compatibility in a more competitive environment, 19:128 (RA;US)

Energy Policy
The mineral estate and natural gas producer in the post-636/Energy Policy Act Era, 19:147 (RA;US)

Environmental Impacts
Natural gas for public and private transportation: Present situation and prospects, 19:138 (R;IT;In Italian)

Exhaust Recirculation Systems
Kinetic modelling of gas phase nitrogen chemistry in combustion, 19:42 (R;FI)

Gas Analysis
Pressurized burner test facility, 19:159 (R;US)

Marginal-Cost Pricing
Natural gas distribution costs and efficiency implications for regulation, 19:129 (RA;US)

Market
A 1990s commissioner views the role of long-term contracts in utility gas procurement, 19:112 (RA;US)
Commercial gas cooling market, 19:108 (RA;US)
Commercial markets, 19:109 (RA;US)
DOE/NARUC national conference on natural gas use, 19:119 (RA;US)
Deregulatory dynamics: Bypass and reckoning in the California gas market, 19:151 (RA;US)
Fundamentals of utility gas-acqusition strategy for the 1990s (in 600 words or less), 19:110 (RA;US)
Industrial markets: Trying to adapt to life under order 636, 19:152 (RA;US)
Industrial markets: What your customers really think of the gas industry, 19:131 (RA;US)
Natural gas, power generation and order No. 636: Regulatory and commercial issues that must be addressed for the courtship to lead to consummation, 19:154 (RA;US)
Oversight of regulated utilities' fuel supply contracts: Achieving maximum benefit from competitive natural gas and emission allowance markets, 19:116 (RA;US)
Remarks to the DOE/NARUC conference on natural gas in the post-order 636/EPACT environment, 19:132 (RA;US)
Service to industrial markets, 19:153 (RA;US)
"Risk and reward in natural gas", 19:118 (RA;US)

Marketing
NARUC-DOE second national conference on natural gas use, 19:107 (RA;US)
Natural gas distribution costs and efficiency implications for regulation, 19:129 (RA;US)
Remarks by William F. Whitsitt, 19:130 (RA;US)
Service to residential markets, 19:126 (RA;US)
What is the real federal policy for residential natural gas use, 19:127 (RA;US)

Meetings
IOGCC/DOE oil and gas environmental workshop, 19:93 (R;US)
IOGCC/DOE oil and gas environmental workshop, 19:92 (R;US)

Prices
Larry Hall, President and COO K N Energy, Inc., 19:124 (RA;US)
Remarks by William F. Whitsitt, 19:130 (RA;US)

Use of innovative administrative procedures to cut the gordian knot: State PSC policy-making for more competitive gas markets, 19:149 (RA;US)

Procurement
A 1990s commissioner views the role of long-term contracts in utility gas procurement, 19:112 (RA;US)
Designing purchased gas adjustment clauses to provide for incentive compatibility in a more competitive environment, 19:128 (RA;US)
Presentation outline DOE/NARUC national conference on natural gas use, 19:114 (RA;US)
"PUC review of supply management", 19:115 (RA;US)
"Risk and reward in natural gas", 19:118 (RA;US)

Production
Draft report: Status of petroleum production industry in California: The cost of regulatory compliance, 19:148 (RA;US)
The mineral estate and natural gas producer in the post-636/Energy Policy Act Era, 19:147 (RA;US)
US production of natural gas from tight reservoirs, 19:134 (R;US)

Prospecting
Prospecting petroleum or natural gas reservoirs with CR-39, 19:1664 (IA;CN)

Rate Structure
Regulators, themselves, 19:150 (RA;US)

Research Programs
Natural gas for public and private transportation: Present situation and prospects, 19:138 (R;IT;In Italian)

Spot Market
A third-party summary of ARTA views on LDC gas-procurement and its regulatory surveillance, 19:111 (RA;US)

Staged Combustion
Parametric study of natural gas reburn chemistry using kinetic modelling, 19:158 (R;FI)

Storage
Supply planning in the post-order No. 636 environment, 19:144 (RA;US)

Supply and Demand
DOE/NARUC national conference on natural gas use, 19:121 (RA;US)
Fundamentals of utility gas-acqusition strategy for the 1990s (in 600 words or less), 19:110 (RA;US)
IRP, DSM, and fuel switching panel, 19:143 (RA;US)
Larry Hall, President and COO K N Energy, Inc., 19:124 (RA;US)
Supply planning in the post-order No. 636 environment, 19:144 (RA;US)

Taxes
Bill Shane's bullets, 19:146 (RA;US)

Transport
Supply planning in the post-order No. 636 environment, 19:144 (RA;US)

Uses
Capacity options: Independent power producers, pipeline capacity, and state commissions, 19:145 (RA;US)
DOE/NARUC - National conference on natural gas use, 19:137 (RA;US)
Government natural gas vehicle initiatives: Paving the way, 19:117 (RA;US)

NATURAL GAS APPLIANCES
See GAS APPLIANCES

NATURAL GAS DEPOSITS

Reflections about state policies in a post-order 636/Energy Policy Act era, 19:106 (RA;US)
"Risk and reward in natural gas", 19:118 (RA;US)

Compiled Data
Natural gas monthly, September 1993, 19:133 (R;US)

Deregulation
Balancing competition and regulation in the 90s, 19:113 (RA;US)
DOE/NARUC national conference on natural gas use, 19:122 (RA;US)
Oversight of regulated utilities' fuel supply contracts: Achieving maximum benefit from competitive natural gas and emission allowance markets, 19:116 (RA;US)
Service to industrial markets, 19:153 (RA;US)

Environmental Impacts
IOGCC/DOE oil and gas environmental workshop, 19:92 (R;US)
IOGCC/DOE oil and gas environmental workshop, 19:93 (R;US)

Financing
DOE/NARUC national conference on natural gas use, 19:119 (RA;US)

Historical Aspects
Mexican demand for US natural gas, 19:103 (R;US)

Pollution Regulations
Clean air: Level the NOX playing field for all fuels, 19:136 (RA;US)

Regulations
A third-party summary of ARTA views on LDC gas-procurement and its regulatory surveillance, 19:111 (RA;US)
Acting assistant secretary for policy Department of Energy, 19:105 (RA;US)
Bill Shane's bullets, 19:146 (RA;US)
Capacity options: Independent power producers, pipeline capacity, and state commissions, 19:145 (RA;US)
DOE/NARUC national conference on natural gas use, 19:119 (RA;US)
Deregulatory dynamics: Bypass and reckoning in the California gas market, 19:151 (RA;US)
Draft report: Status of petroleum production industry in California: The cost of regulatory compliance, 19:148 (RA;US)
IRP, DSM, and fuel switching panel, 19:143 (RA;US)
Industrial markets: Trying to adapt to life under order 636, 19:152 (RA;US)
Larry Hall, President and COO K N Energy, Inc., 19:124 (RA;US)
Natural gas, power generation and order No. 636: Regulatory and commercial issues that must be addressed for the courtship to lead to consummation, 19:154 (RA;US)

Oversight of regulated utilities' fuel supply contracts: Achieving maximum benefit from competitive natural gas and emission allowance markets, 19:116 (RA;US)
Reflections about state policies in a post-order 636/Energy Policy Act era, 19:106 (RA;US)
Regulators, themselves, 19:150 (RA;US)
Remarks to the DOE/NARUC conference on natural gas in the post-order 636/EPACT environment, 19:132 (RA;US)
Service to industrial markets, 19:153 (RA;US)
Supply planning in the post-order No. 636 environment, 19:144 (RA;US)
The mineral estate and natural gas producer in the post-636/Energy Policy Act Era, 19:147 (RA;US)
Use of innovative administrative procedures to cut the gordian knot: State PSC policy-making for more competitive gas markets, 19:149 (RA;US)
"PUC review of supply management", 19:115 (RA;US)
"Risk and reward in natural gas", 19:118 (RA;US)

Resource Management
IRP, fuel switching, and demand side management DOE/NARUC national conference on natural gas use, 19:120 (RA;US)

Reviews
Outline of comments, 19:104 (RA;US)

Tax Laws
BTU energy tax, 19:140 (RA;US)
Bill Shane's bullets, 19:146 (RA;US)
NARUC DOE conference, 19:142 (RA;US)
Remarks of Peter A. Bradford, 19:139 (RA;US)
The law of unintended consequences, 19:141 (RA;US)

NATURAL GAS WELLS
The Atlas of Major Appalachian Basin Gas Plays: Data collection and compilation, 19:101 (R;US)
Treatment of produced waters by electrocoagulation and reverse osmosis, 19:90 (R;US)
US production of natural gas from tight reservoirs, 19:134 (R;US)

NATURAL RADIOACTIVITY
Environmental radiation data, 9: Background dose rates in and around Tokyo etc. measured with portable instruments (Feb., 1991 - Mar., 1993), 19:2071 (R;JP;In Japanese)
Evaluation of natural environmental radiation levels from gamma field spectrometry, 19:2007 (I;BR;In Portuguese)
Is anyone regulating naturally occurring radioactive material? A state survey, 19:1894 (R;US)

NAVAL REACTORS

NEODYMIUM BORIDES
Very high coercivity magnetic stripes produced by particle rotation, 19:480 (R;US)

NEODYMIUM COMPLEXES
Hypersensitive transition spectrum of f-element and coordination structure, 19:1284 (R;CN;In Chinese)

NEODYMIUM LASERS
Final report on optical damage tests, 19:2762 (R;US)

NEODYMIUM OXIDES
Anomalous magnetoresistance behavior of superconducting $Nd_{2-x}Ce_xCuO_{4-y}$ single crystal, 19:1096 (R;US)
Crystal structure and short-range oxygen defects in La- and Nd-modified ZrO_2, 19:1071 (R;US)

NEON 20 BEAMS
Estimate of the absorbed dose due to the ^{20}Ne beam with the energy of 77.1 MeV/nucleon and its fragments formed in interactions with water and plexiglas, 19:2156 (IA;CN)

NEOPLASMS
See also LEUKEMIA
A comparison of radiological risk assessment methods for environmental restoration, 19:391 (R;US)
A risk comparison for startup of plutonium thermal stabilization operations, 19:387 (R;US)

NEPAL
Basic investigation on feasibility of verification researches for new energy technologies in Asian developing countries (Nepal, Mongolia and Bhutan), 19:851 (R;JP;In Japanese)

NEPTUNIUM
See also NEPTUNIUM-ALPHA
In vivo chelation of Am(III), Pu(IV), Np(V), and U(VI) in mice by TREN-(Me-3,2-HOPO), 19:2226 (R;US)
Neptunium storage at Hanford, 19:354 (R;US)
Status of development of actinide blanket processing flowsheets for accelerator transmutation of nuclear waste, 19:282 (R;US)

NEPTUNIUM 235
Sorption of Cs, U, Np and Pu and diffusion of water, Cs and Np in basic plutonic rocks and vulcanite, 19:380 (R;FI)

NEPTUNIUM-ALPHA
Atomic thermal vibrations of the light actinide elements, 19:1301 (R;US)

NERVA NUCLEAR ROCKET ENGINE
See NERVA REACTOR

NERVA REACTOR
F2D users manual: A two-dimensional compressible gas flow code, 19:721 (R;US)

NETWORKS (COMPUTER)
See COMPUTER NETWORKS

NEURAL NETWORKS
A novel process monitoring and control system based on a neural manufacturing concept, 19:1454 (R;US)
General asymmetric neutral networks and structure design by genetic algorithms: A learning rule for temporal patterns, 19:2864 (R;US)
Optimal field-scale groundwater remediation using neural networks and the genetic algorithm, 19:448 (R;US)
Possibility of neutral network usage for B-meson events selection in calorimetric trigger, 19:1785 (R;RU;In Russian)

NEURIDINE
See SPERMINE

NEUTRAL ATOM BEAM INJECTION
Beam species mix as a function of DIII-D neutral beam ion source operation parameters, 19:2751 (R;US)
TPX/TFTR Neutral Beam energy absorbers, 19:2783 (R;US)

NEUTRAL-PARTICLE TRANSPORT
See also NEUTRON TRANSPORT
PHOTON TRANSPORT
Neutral gas transport modeling with DEGAS 2, 19:2717 (R;US)

NEUTRALIZATION (CHEMICAL)
See PH VALUE

NEUTRINO-NUCLEON INTERACTIONS
See also NEUTRINO-PROTON INTERACTIONS
Present status of parton distributions, 19:2416 (R;GB)

NEUTRINO-PROTON INTERACTIONS
Pions and neutrinos as probes of the nucleon and nuclear few-body system, 19:2397 (R;US)

NEUTRON ACTIVATION ANALYSIS
Neutron activation analysis in geological samples containing rare earths, uranium and thorium, 19:1174 (IA;BR;In Portuguese)

NEUTRON BEAMS
Reactor beam profile measurements with electrochemically etched track detectors, 19:1744 (IA;CN)

NEUTRON CAPTURE
See NEUTRON REACTIONS

NEUTRON CAPTURE THERAPY
Proposal of a research and development program for cerebral tumor treatment by neutron capture, 19:2155 (IA;BR;In Portuguese)

NEUTRON DETECTION
Sensitivity of calculations of ^{252}Cf-source-driven noise analysis measurements to cross sections for aqueous fissile solutions, 19:1286 (R;US)

NEUTRON DETECTORS
See also PROTON RECOIL DETECTORS
Calculation of the response function of the neutron detector based on liquid organic scintillator, 19:1782 (R;RU;In Russian)
Evaluation of in-plant neutron coincidence counters for the measurement of molten salt extraction residues, 19:279 (R;US)

Neutron detector for fusion reaction-rate measurements, 19:2791 (R;US)

NEUTRON DIFFRACTION
Hysteresis phenomena at spin-flop transition induced by the pulsed magnetic field, 19:2578 (R;RU;In Russian)
Temperature and field dependencies of neutron scattering intensity at coherent spin-flop transition in Cr_2O_3, 19:2577 (R;RU;In Russian)

NEUTRON DIFFRACTOMETERS
[Construction of a small angle neutron scattering spectrometer for investigation of microemulsions and micellar solutions in bulk, in porous materials and under shear]: Progress report [Phase 1, July 1, 1990–June 30, 1993], 19:1615 (R;US)

NEUTRON DIFFUSION EQUATION
Kinetic methods for the diffusion equations in nuclear PWR, 19:700 (R;FR)
Reflector modelization for neutronic diffusion and parameters identification, 19:699 (R;FR)

NEUTRON DOSIMETRY
Implications of new ICRP and ICRU recommendations on the use of S.S.D.T. detectors for neutron dosimetry, 19:2216 (IA;CN)
Neutron dosimetry by means of chemically etched CR-39 material PATRAS, 19:1659 (IA;CN)
Thermal neutron dosimetry with SSNTD, 19:1749 (IA;CN)

NEUTRON ECONOMY
See NEUTRON FLUX

NEUTRON FLUENCE
See also DAMAGING NEUTRON FLUENCE
Neutron dosimetry with the $^{58}Ni(n,p)^{58}Co$ reaction at short-decay times, 19:2516 (R;US)

NEUTRON FLUX
Measurement of thermal, epithermal and fast neutrons fluxes by the activation foil method at IEA-R1 reactor, 19:769 (IA;BR;In Portuguese)
Monte Carlo next-event point flux estimation for RCP01, 19:2528 (R;US)

NEUTRON FLUX DENSITY
See NEUTRON FLUX

NEUTRON LEAKAGE
Experiment of neutron multiplication in beryllium, 19:1613 (R;CN)

NEUTRON MOISTURE METERS
See MOISTURE GAGES

NEUTRON RADIOGRAPHY
Neutron radiography, 19:493 (IA;BR;In Portuguese)

NEUTRON REACTIONS
Measurement of formation cross sections of short-lived nuclei by 14 MeV neutrons - Ru, Pd, Cd, Sn -, 19:2495 (R;JP)
Neutron-induced particle production in the cumulative and non-cumulative regions at intermediate energies, 19:2500 (R;RU)
Spin dependence of nuclear reaction cross-sections, 19:2447 (IA;UA)
Testing T-odd, p-even interactions with gamma-rays from neutron p-wave resonances, 19:2504 (R;RU)

NEUTRON SOURCE FACILITIES
Analysis of beam on target interaction in a neutron-source test facility, 19:2728 (R;US)
Design of a target and moderator at the Los Alamos Spallation Radiation Effects Facility (LASREF) as a neutron source for fusion reactor materials development, 19:2768 (R;US)
The Manuel Lujan, Jr. Neutron Scattering Center (LANSCE) experiment reports 1992 run cycle: Progress report, 19:2581 (R;US)

NEUTRON SOURCES
A report of the Basic Energy Sciences Advisory Committee: 1992 review of the Basic Energy Sciences Program of the Department of Energy, 19:2803 (R;US)
Linear induction accelerators for fusion and neutron production, 19:2773 (R;US)
Neutronics of a D-Li neutron source – an overview, 19:987 (R;US)
Physics of neutron production at the Oak Ridge Electron Linear Accelerator, 19:491 (R;US)

NEUTRON SPECTRA
Measurement of energy spectrum parameter in irradiation tube of prototype miniature neutron source reactor (MNSR) with SSNTD, 19:1752 (IA;CN)
Neutron spectra profile in beam ports of a triga Mark III experimental reactor, 19:770 (IA;CN)
Neutron spectrum measurements using electrochemically etched CR-39: spectrum unfolding procedures, 19:2520 (IA;CN)

NEUTRON SPECTROMETERS
Design study of a time-of-flight neutron spectrometer for JT-60U, 19:2757 (R;JP)

NEUTRON THERAPY
See also NEUTRON CAPTURE THERAPY
Particle therapy, 19:2158 (R;US)

NEUTRON TRANSPORT
Los Alamos National Laboratory accelerator production of tritium project: Topical report, Radionuclide production experiment, 19:2526 (R;US)
TART calculations of neutron attenuation and neutron-induced photons on 5% and 20% borated polyethylene slabs, 19:2527 (R;US)

NEUTRON TRANSPORT THEORY
Monte Carlo next-event point flux estimation for RCP01, 19:2528 (R;US)

NEUTRON-NEUTRON INTERACTIONS
Neutron-neutron scattering - possibility of in-beam experiment, 19:2393 (R;RU)

NEUTRON-RICH ISOTOPES
The production of the neutron-rich heavy nuclei of the astrophysical interest at the IRIS facility, 19:2485 (IA;UA)

NEUTRONS
See also FISSION NEUTRONS
RESONANCE NEUTRONS
Consistent analysis of the spin content of the nucleon, 19:2439 (R;GB)
Research on some boron-bearing fabric and transparent resin materials shielding neutron efficiency, 19:2189 (R;CN;In Chinese)
The method of measuring the first neutrons generation density space distribution in a pulsed booster, 19:1540 (R;RU;In Russian)

NEVADA
Quaternary geology and neotectonic activity along the Fish Lake Valley Fault Zone, Nevada and California, 19:288 (R;US)

NEVADA TEST SITE
Announced United States nuclear tests, July 1945–December 1992: Revision 13, 19:1859 (R;US)
Autocharacterization feasibility system on Hunters Trophy event, 19:1867 (R;US)
Cavity gas pressure measurements on DIAMOND FORTUNE, 19:1463 (R;US)
Seismic Safety Program: Ground motion and structural response, 19:1860 (R;US)

NEW ENGLAND

Argon 40
Registration threshold for tracks of ^{40}Ar ions in muscovite mica, 19:1705 (IA;CN)
Canonical Transformations
Application of discrete transformations in the problem of preliminary data processing for experiments in high energy physics. Case of correlated measuremenet errors, 19:2854 (R;RU;In Russian)
Carbon Dioxide Lasers
Effect of CO_2 pulsed laser on the registration properties of nuclear tracks of CR-39, 19:1669 (IA;CN)
Counting Techniques
Development on the instrumentation for counting and analysis of particle tracks in solids, 19:1676 (IA;CN)
Track counting by an image analysing system, 19:1735 (IA;CN)
Crystal Structure
Influence of the irradiation temperature and of the crystallographic structure on track formation in metallic compounds, 19:2591 (IA;CN)
Data Processing
Application of discrete transformations in the problem of preliminary data processing for experiments in high energy physics. Case of correlated measuremenet errors, 19:2854 (R;RU;In Russian)
Integral analysis of tracks data in solenoid, 19:1772 (R;RU)
Dielectric Track Detectors
Ageing effects on a new polymeric track detector SR-90 and a model of the nuclear track formation, 19:1686 (IA;CN)
Effect of CO_2 pulsed laser on the registration properties of nuclear tracks of CR-39, 19:1669 (IA;CN)
Electrochemistry
Track treeing mechanism and its application, 19:1675 (IA;CN)
Electrolysis
Electrolytic Measurements on latent heavy ion tracks in plastic, 19:1721 (IA;CN)
Electron Microscopy
Electron microscopy analysis of krypton ion tracks induced in Durango apatite, 19:2024 (IA;CN)
Etching
Theoretical calculations and Monte Carlo simulations of multiple hole probabilities for etched nuclear tracks, 19:1768 (IA;CN)
Track treeing mechanism and its application, 19:1675 (IA;CN)
Gases
Particle penetration through frozen gases, 19:1644 (IA;CN)
Heavy Ions
Electrolytic Measurements on latent heavy ion tracks in plastic, 19:1721 (IA;CN)
Study of latent heavy ion tracks in SSNTD by small-angle neutron scattering, 19:1668 (IA;CN)
Tracks of swift heavy ions in silver halides, revealed by different methods, 19:1738 (IA;CN)
Image Processing
An automated system for track measurement for the employment of CR-39 as alpha-spectrometer in radon and daughters monitoring, 19:1692 (IA;CN)
Track counting by an image analysing system, 19:1735 (IA;CN)
Images
Tracks of swift heavy ions in silver halides, revealed by different methods, 19:1738 (IA;CN)
Kinetics
Submicroscopic nuclear track kinetic theory and the charge changing process, 19:1704 (IA;CN)
Krypton 86
Electron microscopy analysis of krypton ion tracks induced in Durango apatite, 19:2024 (IA;CN)
Latent Images
Study of latent heavy ion tracks in SSNTD by small-angle neutron scattering, 19:1668 (IA;CN)
Length
Track lengths of 11.4 MeV/u ^{20}Ne ions in CR-39, 19:1706 (IA;CN)
Measuring Instruments
Development on the instrumentation for counting and analysis of particle tracks in solids, 19:1676 (IA;CN)
Membranes
A new nuclear track microporous membrane, 19:506 (IA;CN)
Production and application of particle track membranes in Hungary, 19:501 (IA;CN)
Microstructure
A study of characteristics of microstructures of U-238 in CR-39, 19:1730 (IA;CN)
Minerals
Nuclear tracks in natural and synthetic gemstones, 19:2041 (IA;CN)
Muscovite
Track formation by release of lattice energy in mica, 19:1645 (IA;CN)
Neon Ions
Track lengths of 11.4 MeV/u ^{20}Ne ions in CR-39, 19:1706 (IA;CN)

Angle interferometer cross axis errors, 19:1399 (R;US)
PLATINUM
Atomic probes of surface structure and dynamics: Technical progress report, September 15, 1991–September 14, 1992, 19:1156 (R;US)
Observation of x-ray absorption magnetic circular dichroism in well-characterized iron-cobalt-platinum multilayers, 19:1057 (R;US)
Photoelectron holography of platinum (111), 19:1060 (R;US)
The effect of gamma radiation on reference electrodes and platinum and carbon steel bare metal electrodes in a simulated waste solution: Final report, 19:300 (R;US)
Three tritium systems test assembly (TSTA) off-loop experiments, 19:2769 (R;US)
PLATINUM 186
Influence of angular momentum on fission fragment mass and energy distributions, 19:2510 (R;RU;In Russian)
PLATINUM ALLOYS
See also PLATINUM BASE ALLOYS
Spin-hole doping in the Kondo insulator $Ce_3Bi_4Pt_3$ studied by neutron scattering, 19:2512 (R;US)
PLATINUM BASE ALLOYS
Muon spin relaxation studies of the interplay between magnetism and superconductivity in heavy fermion systems, 19:1028 (R;US)
PLATINUM COMPLEXES
Organometallic chemistry of bimetallic compounds: Annual progress report, 19:1244 (R;US)
PLATYHELMINTHS
Contribution for labelling study of cellular and molecular structures of biomedical interest with technetium 99, 19:2202 (IA;BR;In Portuguese)
PLESIOTHERAPY
See RADIOTHERAPY
PLUMES
A description of the katabatic "plume" from Coal Creek Canyon and its fate in the Rocky Flats Area, 19:1895 (R;US)
Models for close-in atmospheric dispersion, explosive releases, and particle deposition, 19:1955 (R;US)
PLUTONIC ROCKS
See also DIORITES
GRANITES
Ore potential of basic rocks in Finland, 19:2100 (R;FI;In Finnish)
World's youngest exposed granite pluton.: Geological features, ages, and cooling model for Takidani granodiorite, 19:606 (IA;JP;In Japanese)
PLUTONIUM
See also PLUTONIUM-ALPHA
PLUTONIUM-DELTA
Comparison of options for plutonium disposal reactors, 19:377 (R;US)
Effects of non-latching blast valves on the source term and consequences of the design-basis accidents in the Device Assembly Facility (DAF), 19:450 (R;US)
Electrolytic decontamination of conductive materials, 19:284 (R;US)
In vivo chelation of Am(III), Pu(IV), Np(V), and U(VI) in mice by TREN-(Me-3,2-HOPO), 19:2226 (R;US)
Integrated neutron/gamma-ray portal monitors for nuclear safeguards, 19:478 (R;US)
Passive sensor systems for nuclear material monitoring, 19:474 (R;US)
Proposed ion exchange applications in the Hanford separations processes, 19:180 (R;US)
Status of development of actinide blanket processing flowsheets for accelerator transmutation of nuclear waste, 19:282 (R;US)
Supercritical fluid carbon dioxide cleaning of plutonium parts, 19:1865 (R;US)
The toxicological study of plutonium: tumor-inducing effect of plutonium in rats, 19:2192 (R;CN;In Chinese)
The use of a new potentiostat/coulometer in the controlled-potential coulometric determination of plutonium, 19:1215 (R;US)
PLUTONIUM 236
Sorption of Cs, U, Np and Pu and diffusion of water, Cs and Np in basic plutonic rocks and vulcanite, 19:380 (R;FI)
PLUTONIUM 238
Application of a canine ^{238}Pu dosimetry model to human bioassay data, 19:2195 (R;US)
PLUTONIUM 239
Minimum critical mass analytical studies, 19:732 (R;US)
PLUTONIUM CHLORIDES
Status of plutonium trichloride process development (2), 19:183 (R;US)
PLUTONIUM DIOXIDE
Mechanisms of the rapid dissolution of plutonium dioxide in acidic media under oxidizing or reducing conditions, 19:1281 (R;FR)
Status of plutonium trichloride process development (2), 19:183 (R;US)
The toxicological study of plutonium: tumor-inducing effect of plutonium in rats, 19:2192 (R;CN;In Chinese)

PLUTONIUM ISOTOPES
See also PLUTONIUM 236
PLUTONIUM 238
PLUTONIUM 239
MGA and passive neutron measurements, 19:485 (R;US)

PLUTONIUM-ALPHA
Atomic thermal vibrations of the light actinide elements, 19:1301 (R;US)

PLUTONIUM-DELTA
Atomic thermal vibrations of the light actinide elements, 19:1301 (R;US)

PLZT
Photo-induced and electrooptic properties of (Pb,La)(Zr,Ti) O_3 films for optical memories, 19:1132 (R;US)

PMMA
Irradiation of PMMA with high energy light ions: the depth distribution for volatile reaction-product emission, 19:1278 (IA;CN)

PNA
See POLYCYCLIC AROMATIC HYDROCARBONS

PNEUMATIC TRANSPORT
Engineering models for the gas-solid motion and interaction in the return loop of circulating fluidized beds: Topical report, January 1992–June 1992, 19:52 (R;US)

PNL

RADIOACTIVE WASTE DISPOSAL
INSAG-5. A report by the International Nuclear Safety Advisory Group, 19:676 (I;CZ;In Czech)

Administrative Procedures
Environmental restoration and waste management Site-Specific Plan for the Oak Ridge Reservation: FY 1993, 19:1988 (R;US)

Comparative Evaluations
Project Alternative Systems Study - PASS. Analysis of performance and long-term safety of repository concepts, 19:327 (R;SE)
Project on Alternative Systems Study - PASS. Comparison of technology of KBS-3, MLH, VLH and VDH concepts by using an expert group, 19:326 (R;SE)
Project on Alternative Systems Study - PASS. Final report, 19:331 (R;SE)

Coordinated Research Programs
Migration of radionuclides in the geosphere, 19:383 (R;XE;In English, French)
State of Nevada review of Phase 1 of the INTRAVAL Project, 19:289 (R;US)

Dose Rates
Extended probabilistic system assessment calculations within the SKI project-90, 19:333 (R;SE)

Environmental Impacts
Thirteenth annual report of the Technical Advisory Committee on the Nuclear Fuel Waste Management Program, 19:339 (R;CA)

Ground Water
Characterization of natural groundwater colloids at Palmottu, 19:2108 (RA;FI)
Deep groundwater flow at Palmottu, 19:2106 (RA;FI)
Geochemical modelling of Na-SO_4 type groundwater at Palmottu using a mass balance approach, 19:2109 (RA;FI)
Groundwater chemistry at Haestholmen, Loviisa: Summary of investigations in 1980-1992, 19:2123 (R;FI;In Finnish)
Groundwater chemistry of the gabbro bodies at Kivetty and Syyry, 19:2124 (R;FI;In Finnish)
Structural interpretation for mapping of groundwater flow paths at Palmottu U-Th-mineralization, 19:2107 (RA;FI)
The Palmottu analogue project: Overview in 1992, 19:2002 (RA;FI)
The Palmottu analogue project: Progress Report 1992, 19:2001 (R;FI)

Historical Aspects
Characterization of wastes in and around early reactors at the Hanford Site: The use of historical research, 19:359 (R;US)

Hydrology
Geostatistical analysis of hydrological data in five crystalline rock sites in Finland, 19:2126 (R;FI)
Interpretation of the 1989-1992 hydraulic interference tests at the five TVO sites in Finland, 19:2125 (R;FI)

Liquid Flow
On the interpretation of double-packer tests in heterogeneous porous media: Numerical simulations using the stochastic continuum analogue, 19:323 (R;SE)

Permits
Waste Isolation Pilot Plant (WIPP) fact sheet, 19:487 (R;US)

Radionuclide Migration
Modelling in-situ matrix diffusion at Palmottu, 19:2004 (RA;FI)
The Palmottu analogue project: Overview in 1992, 19:2002 (RA;FI)
The Palmottu analogue project: Progress Report 1992, 19:2001 (R;FI)

Research Programs
PASS - Project on Alternative Systems Study. Performance assessment of bentonite clay barrier in three repository concepts: VDH, KBS-3 and VLH, 19:325 (R;SE)
Project on Alternative Systems Study - PASS. Final report, 19:331 (R;SE)

Risk Assessment
Extended probabilistic system assessment calculations within the SKI project-90, 19:333 (R;SE)
Preliminary performance assessment for the Waste Isolation Pilot Plant, December 1992: Volume 5, Uncertainty and sensitivity analyses of gas and brine migration for undisturbed performance, 19:316 (R;US)

Rock Mechanics
Review of excavation methods and their implications for the near-field barrier of a deep underground repository: Final report, 19:251 (R;GB)

Rock-Fluid Interactions
Zircons and fluids: An experimental investigation with applications for radioactive waste disposal: Stability of zircons: Progress report, January 1992–December 1992, 19:247 (R;US)

Site Characterization
Site investigation requirements for a deep repository, 19:250 (R;GB)
State of Nevada review of Phase 1 of the INTRAVAL Project, 19:289 (R;US)

Standards
Critical comments on the US Environmental Protection Agency Standards 40 CFR 191, 19:253 (R;US)

Underground Disposal
Modelling of rock mass response to glaciation in the Dounreay area, Scotland, 19:249 (R;GB)

Uranium
Uranium mineral - groundwater equilibrium at the Palmottu natural analogue study site, Finland, 19:2003 (RA;FI)

On the consistency between macroscopic and macroscopic parts in the Shell correction calculation of the polarized electric dipole, 19:2427 (IA;UA)

RADON
Activation Detectors
Indoor radon measured with nuclear track detectors and charcoal canisters in Hong Kong, 19:1939 (IA;CN)

Activity Levels
Determination of the scale of variation in radon soil gas concentrations using the method of nested sampling, 19:2027 (IA;CN)
Fast and multi-functional method of radon measurement, 19:1913 (IA;CN)
Indoor radon measurement in the northern region of Bangladesh, 19:1919 (IA;CN)
Measurements of radon levels using CSR detector in Harbin and Yan'an, 19:1935 (IA;CN)
Passive radon survey in three floor laboratory, 19:1933 (IA;CN)
Radon level measurements inside mexican caves, 19:1932 (IA;CN)
SSNTD is used to measure the radon concentration in the air in the air-conditioned building, 19:1922 (IA;CN)
Use of SSNTD to study environgeology of carcinogen in Gejiu area, 19:2026 (IA;CN)

Buildings
SSNTD is used to measure the radon concentration in the air in the air-conditioned building, 19:1922 (IA;CN)

Calibration
A non-constant concentration radon calibration chamber, 19:1766 (IA;CN)
Standard radon calibration chamber using SSNTDS, 19:1696 (IA;CN)

Caves
Radon level measurements inside mexican caves, 19:1932 (IA;CN)

China
Measurements of radon levels using CSR detector in Harbin and Yan'an, 19:1935 (IA;CN)
The application of CR-39 solid state nuclear track detectors to radon survey in the main cities of Inner Mongolia, 19:1938 (IA;CN)

Comparative Evaluations
Comparison of radon measuring instruments of Chinese make with of Japanese make in Xi'an, 19:1937 (IA;CN)

Concentration Ratio
Radon concentration measurements in a radon chamber for biological treatment using track detectors, 19:1207 (IA;CN)
The relation between the track etch density and the radon concentration, 19:1671 (IA;CN)

Decay
Measurement of HO_x· production rate due to radon decay in air, 19:1904 (R;US)

Dielectric Track Detectors
A small passive monitor for radon with CR-39 (DAP), 19:1765 (IA;CN)
Earthquake prediction studies in Kangra valley using plastic track recorders, 19:2054 (IA;CN)
Indoor radon measured with nuclear track detectors and charcoal canisters in Hong Kong, 19:1939 (IA;CN)
Measurement of indoor radon concentration by CR-39, 19:1923 (IA;CN)
Statistics and error considerations at the application of SSNTD-technique in radon measurement, 19:1682 (IA;CN)
The application of CR-39 solid state nuclear track detectors to radon survey in the main cities of Inner Mongolia, 19:1938 (IA;CN)
Use of CR-39 as radon and radon daughters detectors for indoor measurements in a mill, in Adana, 19:2030 (IA;CN)
Use of SSNTD to study environgeology of carcinogen in Gejiu area, 19:2026 (IA;CN)

Diffusion
Diffusion of radon through nuclear track microfilters, 19:502 (IA;CN)
Radon diffusion studies in water, soil, air, concrete and sand, 19:2038 (IA;CN)
Radon diffusion studies through hydrocarbons, 19:2053 (IA;CN)
Radon diffusion through thin plastics, 19:2574 (IA;CN)

Diffusion Chambers
A non-constant concentration radon calibration chamber, 19:1766 (IA;CN)

Dosemeters
CR-39 and LR-115 as a secondary standard dosemeter for radon dose calibration, 19:1672 (IA;CN)
Passive radon personal dosemeter, 19:1697 (IA;CN)

Drinking Water
Uranium and radon in wells drilled into bedrock in Southern Finland, 19:2000 (R;FI;In Finnish)

Element Abundance
Uranium and radon in wells drilled into bedrock in Southern Finland, 19:2000 (R;FI;In Finnish)

Environmental Transport
Radon sources emanation in granitic soil and saprolite, 19:2074 (R;US)

Equilibrium
The measurement of equilibrium factor for radon by SSNTD, 19:1917 (IA;CN)

Exposure Chambers
Radon concentration measurements in a radon chamber for biological treatment using track detectors, 19:1207 (IA;CN)

Filters
Diffusion of radon through nuclear track microfilters, 19:502 (IA;CN)

Geophysical Surveys
A comprehensive approach of radon measurements for geophysical studies, 19:2014 (IA;CN)

Ground Water
Investigation of radon in subsurface soil and water as an earthquake precursor, 19:2039 (IA;CN)

Houses
Radon measurement in dwelling around the hot spring in the north west of Iran, 19:1928 (IA;CN)
Radon measurement in dwellings, 19:1934 (IA;CN)

Hydrocarbons
Radon diffusion studies through hydrocarbons, 19:2053 (IA;CN)

Industrial Plants
Use of CR-39 as radon and radon daughters detectors for indoor measurements in a mill, in Adana, 19:2030 (IA;CN)

Laboratories
Passive radon survey in three floor laboratory, 19:1933 (IA;CN)

Measuring Instruments
Comparison of radon measuring instruments of Chinese make with of Japanese make in Xi'an, 19:1937 (IA;CN)

Measuring Methods
Fast and multi-functional method of radon measurement, 19:1913 (IA;CN)

Mines
Nuclear track detectors for radon monitoring in coal mines in Kouzbass Siberian region (Russian Confederation), 19:1665 (IA;CN)
Radon distribution measurement of LUGO coal mine by CSR technique, 19:2057 (IA;CN)

Nuclear Facilities
Measurement of indoor radon concentration by CR-39, 19:1923 (IA;CN)

Particle Tracks
An automated system for track measurement for the employment of CR-39 as alpha-spectrometer in radon and daughters monitoring, 19:1692 (IA;CN)
The relation between the track etch density and the radon concentration, 19:1671 (IA;CN)

Porous Materials
A tri-dimensional model for radon transport in a porous, 19:2056 (IA;CN)

Radiation Detection
Experiences with radon measurements for earthquake prediction and landslides, 19:2018 (IA;CN)
Usefulness of radon measurements in earth sciences, 19:2013 (IA;CN)

Radiation Monitoring
Comparison of short-term radon monitoring to long-term averages, 19:1926 (IA;CN)
Development of measuring techniques using silicon diode pin detector for continuous radon monitoring, 19:1925 (IA;CN)
Landslide prediction by soil radon monitoring, 19:2028 (IA;CN)
Radon Monitoring in soils and water, 19:2016 (IA;CN)
Radon and earthquake prediction: present status and future trends, 19:2015 (IA;CN)
Radon monitoring related to a subduction zone in Mexico, 19:2017 (IA;CN)
Recommendations for the setting up of a radon in soil network based upon a decennial study, 19:2055 (IA;CN)

Radiation Monitors
A small passive monitor for radon with CR-39 (DAP), 19:1765 (IA;CN)
Response of different passive detectors in a radon chamber, 19:1761 (IA;CN)

Radiation Protection
Comparative studies of polymer materials as radon protection coatings, 19:1121 (IA;CN)

Radiations
A comprehensive approach of radon measurements for geophysical studies, 19:2014 (IA;CN)

Radionuclide Migration
A tri-dimensional model for radon transport in a porous, 19:2056 (IA;CN)
Characterisation of soil parameters for radon assessment in human environments, 19:2040 (IA;CN)

Samplers
Standard radon calibration chamber using SSNTDS, 19:1696 (IA;CN)

Sampling
Determination of the scale of variation in radon soil gas concentrations using the method of nested sampling, 19:2027 (IA;CN)

Soils
An automatic electronic counter for short term radon measurements in soil and/or water, 19:1760 (IA;CN)
Characterisation of soil parameters for radon assessment in human environments, 19:2040 (IA;CN)
Investigation of radon in subsurface soil and water as an earthquake precursor, 19:2039 (IA;CN)
Recommendations for the setting up of a radon in soil network based upon a decennial study, 19:2055 (IA;CN)
Soil radon dosimeter for hot humid tropical region, 19:1762 (IA;CN)

Spatial Distribution
Investigation on distribution of indoor and outdoor radon concentrations, 19:1914 (IA;CN)
Radon distribution measurement of LUGO coal mine by CSR technique, 19:2057 (IA;CN)

Thermal Springs
Radon measurement in dwelling around the hot spring in the north west of Iran, 19:1928 (IA;CN)

Thin Films
Radon diffusion through thin plastics, 19:2574 (IA;CN)

Tropical Regions
Soil radon dosimeter for hot humid tropical region, 19:1762 (IA;CN)

Water
An automatic electronic counter for short term radon measurements in soil and/or water, 19:1760 (IA;CN)

RADON 222
Development of measure methods of radon in indoor air, 19:1912 (IA;BR;In Portuguese)
Exhalation of ^{222}Rn from papers, 19:1927 (IA;CN)
Measurement of concentrations of radon and its daughters in indoor atmosphere using CR-39 nuclear track detector, 19:1208 (IA;CN)
The effect of using water in a toilet on indoor radon level, 19:1936 (IA;CN)

SILICON NITRIDES

SIGMA BARYONS
Semileptonic heavy-to-light decays of baryons, 19:2390 (R;RU)

SIGMA MODEL
Dissipative quantum dynamics and nonlinear sigma-model, 19:2287 (R;RU)

SIGMA-410 RESONANCES
See SIGMA MODEL

SILANES
Infrared spectroscopy of organic free radicals related to combustion processes, 19:1364 (RA;US)

SILICEOUS ROCK
See SANDSTONES

SILICON
Calibration of the apparent temperature of silicon single crystals as a function of their true temperature and their thickness as determined by infrared measurements, 19:1586 (R;US)
Development of silicon nitride composites with continuous fiber reinforcement, 19:1130 (R;US)
Effect of substrate roughness on porous silicon light emission, 19:1120 (R;IT)
Gas-pressure forming of superplastic ceramic sheet, 19:1103 (R;US)
Interlaboratory verification of neutron spectra used for the testing of electronic parts, 19:1809 (R;US)
Mobil Solar Energy Corporation thin EFG octagons: Semiannual subcontract report, 1 April 1992–30 September 1992, 19:558 (R;US)
NREL photovoltaic subcontract reports: Abstracts and document control information, 1 August 1992–31 July 1993, 19:556 (R;US)
Optimization of an electron cyclotron resonance plasma etch process for n^+ polysilicon: HBr process chemistry, 19:1136 (R;US)
Particle behavior in an ECR plasma etch tool, 19:1453 (R;US)
Systematics of hadronic production from Si and Pb with 14.6 × A GeV/c Si beams, 19:2460 (R;US)
X-ray characterization of a three-element condenser system for soft x-ray projection lithography, 19:1460 (R;US)

SILICON 28
Study of range-energy relation of ^{28}Si heavy ions in Tuffak polycarbonate track detector, 19:1663 (IA;CN)

SILICON ALLOYS
Large-scale production of $Si_{0.8}Ge_{0.2}$ thermoelectric alloys by mechanical alloying, 19:876 (R;US)

SILICON CARBIDES
An assessment of the cost of microwave sintering ceramic tiles for armor applications: Phase 1, 19:1100 (R;US)
Applications of laser-induced gratings to spectroscopy and dynamics, 19:1350 (RA;US)
Discontinuous phase formation and selective attack of SiC materials exposed to low oxygen partial pressure environments, 19:1097 (R;US)
Dynamic properties of ceramic materials, 19:1101 (R;US)
Ion beam milling of silicon carbide optical components, 19:1876 (R;US)

SILICON HYDRIDES
See SILANES

SILICON NITRIDES
Development of silicon nitride composites with continuous fiber reinforcement, 19:1130 (R;US)
Effect of powder characteristics on gas-pressure sintering of Si_3N_4 with rare earth additives, 19:1080 (R;US)
High temperature alkali corrosion of ceramics in coal gas: Eighth quarterly progress report, June 1, 1993–September 1, 1993, 19:1085 (R;US)
Surface and subsurface defect detection in Si_3N_4 components by laser scattering, 19:1070 (R;US)

SILICON OXIDES
Dielectric properties and electronic applications of aerogels, 19:1107 (R;US)

SILICON SEMICONDUCTOR DETECTORS
See SI SEMICONDUCTOR DETECTORS

SILICON SOLAR CELLS
Amorphous silicon PVMaT Phase 2A: Semiannual subcontract report, 1 May 1992–31 October 1992, 19:559 (R;US)
Mobil Solar Energy Corporation thin EFG octagons: Semiannual subcontract report, 1 April 1992–30 September 1992, 19:558 (R;US)
Progress in phases 2 and 3 of the Photovoltaic Manufacturing Technology Project (PVMaT), 19:557 (R;US)

SILICONES
The decay of chemical weapons agents under environmental conditions, 19:1885 (R;US)

SILVER
Powder synthesis, fabrication, and transport properties of long-length Ag clad Bi-2223 conductors, 19:988 (R;US)
Semi-kinematical analysis of 3- and 4-pronged events of the U + Ag reaction at 15 MeV/n, 19:2466 (IA;CN)
Theoretical and experimental investigation of atomic radiative lifetimes and hyperfine structures, 19:2533 (R;SE)
Thermomechanical processing of Ag-clad $Bi_2Sr_2CaCu_2O_x$ superconductors, 19:1109 (R;US)
Tracks of swift heavy ions in silver halides, revealed by different methods, 19:1738 (IA;CN)

SILVER 102
Isobaric and mass distribution in the interaction of 3.65 A GeV ^{12}C with yttrium and silver, 19:2492 (IA;UA)

SILVER BROMIDES
The nucleation and growing of AgBr microcrystals as a function for making the sensitivity centers and the latent images centers produced by ionizing particles, 19:1708 (IA;CN)

SILVER CHLORIDES
AgCl (Cd) detectors prepared by pressing, 19:1691 (IA;CN)

SIMS
See ION MICROPROBE ANALYSIS

SINGLE CRYSTALS

Design of a target and moderator at the Los Alamos Spallation Radiation Effects Facility (LASREF) as a neutron source for fusion reactor materials development, 19:2768 (R;US)
Targetry '91: Proceedings of the 4. international workshop on targetry and target chemistry, 19:1303 (R;CH)

TATB
Condensed-phase thermal decomposition of TATB investigated by atomic force microscopy (AFM) and simultaneous thermogravimetric modulated beam mass spectrometry (STMBMS), 19:1856 (R;US)
Shock sensitivity of IHE at elevated temperatures, 19:1849 (R;US)

TAX LAWS
BTU energy tax, 19:140 (RA;US)
NARUC DOE conference, 19:142 (RA;US)
Remarks of Peter A. Bradford, 19:139 (RA;US)
The law of unintended consequences, 19:141 (RA;US)

TEA
See BEVERAGES

TECHNETATES
Screening of sorption materials for radioiodine and technetium, 19:1242 (R;CN;In Chinese)

TECHNETIUM
Characterization of ventilation ductwork in Building K-29 at the Oak Ridge K-25 Site, 19:2229 (R;US)
Comparative synergistic (technetium-actinide) extraction chemistry by tributylphosphate and some amide extractants, 19:210 (R;FR)
Status of development of actinide blanket processing flowsheets for accelerator transmutation of nuclear waste, 19:282 (R;US)

TECHNETIUM 99
Extraction of technetium from simulated Hanford tank wastes, 19:237 (R;US)
$[^{99m}Tc(CNCH_2COO^-)_6]^{-5}$: preliminary evaluation as tracer for studies of renal function, 19:1292 (IA;BR;In Spanish)

TECHNOLOGY UTILIZATION
Health risks in perspective: Judging health risks of energy technologies, 19:2165 (R;US)
Survey on research and development aiding operations subsidized by coal production and utilization technology promotional fund.: Third Pan-Pacific coal workshop, 1992, 19:63 (R;JP;In Japanese)

TECTONICS
Thermal and tectonic history of two basins in north China, 19:2046 (IA;CN)

TEFLON
Techniques for producing free-standing thin films on frames, 19:1133 (R;US)

TEKTITES
Application of FT dating to archaeometry: provenance studies of prehistoric obsidian artifacts, 19:1197 (IA;CN)

TELEMETRY
Automated binding of attributes to telemetry data, 19:1397 (R;US)
Reentry vehicle adaptive telemetry, 19:1394 (R;US)

TELESCOPES
Sodium-layer laser guide stars, 19:1814 (R;US)

TELLURIUM ISOTOPES
Spin dependence of nuclear reaction cross-sections, 19:2447 (IA;UA)

TEMPERATURE (1000-4000 K)
See TEMPERATURE RANGE 1000-4000 K

TEMPERATURE (ELECTRON)
See ELECTRON TEMPERATURE

TEMPERATURE GRADIENTS
Kinetic resonance damping rate of the toroidal ion temperature gradient mode, 19:2637 (R;US)

TEMPERATURE MEASUREMENT
A field evaluation of remote sensor measurements of wind, temperature, and moisture for ARM integrated sounding system research, 19:1815 (R;US)
Simulation experiment for the U-H-Zr fuel element surface temperature measurement calibration in the outside of reactor, 19:743 (R;CN;In Chinese)

TEMPERATURE RANGE 1000-4000 K
Experimental setup for studying the kinetics of high temperature gas reactions, 19:1228 (R;FI)

TENDONS (STRUCTURAL)
See CABLES

TERBIUM OXIDES
Synthesis and characterization of charge-substituted garnets $YCaLnGa_5O_{12}$ (Ln = Ce,Pr,Tb), 19:1068 (R;US)

TERBIUM PHOSPHATES
Spectroscopic studies of magnetic transitions in $TbPO_4$, 19:1230 (R;US)

TERNARY ALLOY SYSTEMS
Microstructural evolution of neutron-irradiated Fe-Cr-Ni ternary alloys at high helium generation rates, 19:1038 (R;US)

TERRESTRIAL BACKGROUND
See BACKGROUND RADIATION

TERRESTRIAL ECOSYSTEMS
Surveys and studies on soil pollution/changes assessment using surface ecology information and soil recovery system, 19:2075 (R;JP;In Japanese)

TERTIARY RECOVERY

Ablation
Computational model of surface ablation from tokamak disruptions, 19:2730 (R;US)
Alfven Waves
Continuum damping of ideal toroidal Alfven eigenmodes, 19:2636 (R;US)
Ballooning Instability
Analysis of current diffusive ballooning mode, 19:2704 (R;JP)
Model of the L-mode confinement in tokamaks, 19:2701 (R;JP)
Charged-Particle Transport
Diagnosing fast electron diffusion by EC radiation, 19:2643 (RA;FR)
Construction
TPX assembly plan, 19:2780 (R;US)
Control Systems
Plasma vertical stability and feedback control for TPX, 19:2781 (R;US)
Current-Drive Heating
1993 annual report for the Phaedrus-T RF current drive experiments, 19:2738 (R;US)
Design
Engineering design of ARIES-III, 19:2731 (R;US)
The engineering design of TPX, 19:2782 (R;US)
Divertors
Non-local transport in a tokamak plasma divertor with recycling, 19:2718 (R;US)
Drift Instability
Fluid simulations of ∇T_e-driven turbulence and transport in boundary plasmas, 19:2722 (R;US)
Feasibility Studies
[Recent results and near term expectations in tokamak research in the US, Europe and Japan], 19:2785 (R;US)
H-Mode Plasma Confinement
Model of the L-mode confinement in tokamaks, 19:2701 (R;JP)
High-Frequency Heating
1993 annual report for the Phaedrus-T RF current drive experiments, 19:2738 (R;US)
Lower Hybrid Current Drive
Diffusion of alpha particles induced by LHW, 19:2652 (RA;CZ)
Magnetic Confinement
Fusion Plasma Theory: Task 1, Magnetic confinement Fusion Plasma Theory: Annual progress report, November 16, 1992–November 15, 1993, 19:2633 (R;US)

Microwave Amplifiers
Mean time between failures (MTBF) and availability of the Gyrotron system used on the Microwave Tokamak Experiment at Lawrence Livermore National Laboratory, 19:2795 (R;US)
Neutral Beam Sources
Analysis of neutral beam current drive for ITER, 19:2639 (R;IT)
Neutral beam current drive on dioscur, 19:2640 (R;IT)
Non-Inductive Current Drive
Fast wave at 433 MHz on FTU by a folded waveguide launcher, 19:2623 (R;US)
Plasma
Determination of the plasma column shape in the Tokamak Novillo cross section by magnetic probes., 19:2686 (I;MX;In Spanish)
Plasma Instability
Electron temperature gradient driven instability in the tokamak boundary plasma, 19:2721 (R;US)
Memory effects in turbulent diffusion, 19:2625 (R;SE)
Self-consistent treatment of transport in tokamak plasmas, 19:2627 (R;SE)
Plasma Scrape-Off Layer
A two-dimensional kinetic model of the scrape-off layer, 19:2739 (R;US)
Research Programs
Princeton University Plasma Physics Laboratory, Princeton, New Jersey: Annual report, October 1, 1990–September 30, 1991, 19:2786 (R;US)
Sawtooth Oscillations
A triggering mechanism of fast crash in sawtooth oscillation, 19:2694 (R;JP)
Superconducting Magnets
Structural analysis of a superconducting central solenoid for the Tokamak Physics Experiment, 19:2790 (R;US)
Superconducting magnet system for the TPX Tokamak, 19:2796 (R;US)
TOKAMAK FUSION TEST REACTOR

Track uranium estimation in beverage using SSNTD, 19:2175 (IA;CN)
Absorption Spectroscopy
A new automatic analyzer for uranium determination, 19:1612 (R;CN;In Chinese)
Laser absorption spectroscopy system for vaporization process characterization and control, 19:177 (R;US)
Adsorption
On the adherence of the uranium to the walls of the solution vessels, 19:1122 (IA;CN)
Apatites
Influence of the apatite F/Cl ratio on the uranium fission tracks, 19:2042 (IA;CN)
Calibration Standards
The preparation of 32 CRMS solutions including U and Th, 19:1285 (R;CN;In Chinese)
Carbonate Minerals
Studying uranium distribution in minerals of carbonatite from northwest Pakistan using fission track analysis, 19:2044 (IA;CN)
Casting
The potential of squeeze casting for the production of near net shape uranium parts, 19:184 (R;US)
Concentration Ratio
Uranium content and age determination of various minerals of Iran, 19:1206 (IA;CN)
Deep Inelastic Heavy Ion Reactions
Semi-kinematical analysis of 3- and 4-pronged events of the U + Ag reaction at 15 MeV/n, 19:2466 (IA;CN)
Dielectric Track Detectors
Estimation of uranium and thorium using nuclear track techniques, 19:2049 (IA;CN)
Distribution
Studying uranium distribution in minerals of carbonatite from northwest Pakistan using fission track analysis, 19:2044 (IA;CN)
Drinking Water
Uranium and radon in wells drilled into bedrock in Southern Finland, 19:2000 (R;FI;In Finnish)
Element Abundance
Uranium and radon in wells drilled into bedrock in Southern Finland, 19:2000 (R;FI;In Finnish)
Extraction Chromatography
A new automatic analyzer for uranium determination, 19:1612 (R;CN;In Chinese)
Fission Tracks
Influence of the apatite F/Cl ratio on the uranium fission tracks, 19:2042 (IA;CN)
The uranium content of vegetables determined by method of fission track, 19:1212 (IA;CN)
Fluorescence Spectroscopy
Evaluation of uranium transitions for isotopically-selective laser induced fluorescence with diode lasers (Technical Report for ST064), 19:479 (R;US)
Fossils
Estimation of uranium and thorium using nuclear track techniques, 19:2049 (IA;CN)
Fuel Cycle
A closed uranium cycle at HAPO: Phase 1, 19:725 (R;US)
Gamma Spectroscopy
Determination of U, Th and K concentration and the heat production rate in samples of trough from a well drilling in metasediments from Bambui Group, 19:2010 (I;BR;In Portuguese)
Health Hazards
The potential human health effect(s) of the metal uranium in the environment: Report on the known human health effects associated with the exposure to the metal uranium, 19:418 (R;US)
Hyperfine Structure
On the hyperfine structure in the configuration f^3ds^2 of uranium, 19:2538 (R;FR)
Laser Spectroscopy
Laser absorption spectroscopy system for vaporization process characterization and control, 19:177 (R;US)
Materials Recovery
Environmental assessment of remedial action at the inactive uraniferous lignite ashing sites at Belfield and Bowman, North Dakota, 19:167 (R;US)
Removal of uranium from uranium-contaminated soils–Phase 1: Bench scale testing: Uranium in soils integrated demonstration, 19:431 (R;US)
Meetings
Proceedings of the international symposium on uranium technology [held at Bombay during 13-15 Dec 1989]. V. 2, 19:166 (I;IN)
Proceedings of the international symposium on uranium techology [held at Bombay during 13-15 Dec 1989]. V. 1, 19:165 (I;IN)
Minerals
Uranium content and age determination of various minerals of Iran, 19:1206 (IA;CN)
Natural Radioactivity
Study of heavy ion tracks in certain plants of northern India, 19:2221 (IA;CN)
Particle Tracks
On the adherence of the uranium to the walls of the solution vessels, 19:1122 (IA;CN)
Quantitative Chemical Analysis
Characterization of ventilation ductwork in Building K-29 at the Oak Ridge K-25 Site, 19:2229 (R;US)
Radioecological Concentration
Baseline risk assessment of groundwater contamination at the uranium mill tailings site near Shiprock, New Mexico: Draft, 19:401 (R;US)
Direct probability mapping of contaminants, 19:443 (R;US)
Field demonstration of technologies for delineating uranium contaminated soils, 19:442 (R;US)
Radon sources emanation in granitic soil and saprolite, 19:2074 (R;US)
Radionuclide Kinetics
On the uranium distribution in the internal contamination, 19:2220 (IA;CN)
Redox Reactions
Uranium mineral - groundwater equilibrium at the Palmottu natural analogue study site, Finland, 19:2003 (RA;FI)
Sediments
Determination of U, Th and K concentration and the heat production rate in samples of trough from a well drilling in metasediments from Bambui Group, 19:2010 (I;BR;In Portuguese)
Solvent Extraction
Comparative synergistic (technetium-actinide) extraction chemistry by tributylphosphate and some amide extractants, 19:210 (R;FR)
Tissue Distribution
Distribution of uranium in mice using the fission track technique, 19:2217 (IA;CN)
In vivo chelation of Am(III), Pu(IV), Np(V), and U(VI) in mice by TREN-(Me-3,2-HOPO), 19:2226 (R;US)
On the uranium distribution in the internal contamination, 19:2220 (IA;CN)
Uranium estimation in the blood of poikilothermic and homoiothermic animals, 19:2219 (IA;CN)
Vegetables
The uranium content of vegetables determined by method of fission track, 19:1212 (IA;CN)
URANIUM 232
Monte Carlo simulation of gamma ray scanning gauge, 19:2529 (R;US)
URANIUM 233
Minimum critical mass analytical studies, 19:732 (R;US)
Sorption of Cs, U, Np and Pu and diffusion of water, Cs and Np in basic plutonic rocks and vulcanite, 19:380 (R;FI)
Thorium processing nuclear safety review, 19:440 (R;US)

URANIUM 234
Uranium isotope model used on proportion estimation of deep water mixture, 19:2110 (I;BR;In Portuguese)
URANIUM 235
Minimum critical mass analytical studies, 19:732 (R;US)
Monte Carlo simulation of gamma ray scanning gauge, 19:2529 (R;US)
URANIUM 238
A study of characteristics of microstructures of U-238 in CR-39, 19:1730 (IA;CN)
Fusion-fission of ^{238}U and ^{209}Bi in different SSNTDs, 19:2476 (IA;CN)
Uranium isotope model used on proportion estimation of deep water mixture, 19:2110 (I;BR;In Portuguese)
URANIUM 238 REACTIONS
Study of heavy ion reaction $^{238}U + {}^{nat}U$ at beam energy of 14.2 MeV/N using mica track detector, 19:2481 (IA;CN)
Study of multi-prong events in the interaction of 16.7 MeV/u ^{238}U-ions with ^{nat}Au targets using CR-39 and mica track detectors, 19:2475 (IA;CN)
Study on the interaction of 960 A MeV ^{238}U ions with light nuclei, 19:2480 (IA;CN)
URANIUM ALLOYS
Alloying studies in $U_{1-x}Th_xPd_2Al_3$ ($0 \leq x \leq 1$), 19:1022 (R;US)
Interplay of magnetic and superconducting heavy fermion ground states, 19:1031 (R;US)
Magnetic phases in UNiGe, 19:1027 (R;US)

X-ray amplifier energy deposition scaling with channeled propagation, 19:2519 (R;US)
X-2830 RESONANCES
See MESONS
X-RASERS
See X-RAY LASERS
X-RAY DETECTION
A large area detector for x-ray applications, 19:1609 (R;US)
Energy-resolving x-ray detectors with charge amplification due to multiple quasiparticle tunneling, 19:2585 (R;US)
X-RAY LASERS
A 2–4 nm Linac Coherent Light Source (LCLS) using the SLAC linac, 19:1484 (R;US)
Characterization of germanium stripe x-ray lasers, 19:1457 (R;US)
Ray and wave optics modeling of laboratory x-ray lasers, 19:1461 (R;US)
X-RAY RADIOGRAPHY
Analysis of a proposed Compton backscatter imaging technique, 19:2584 (R;US)
X-RAY SOURCES
Novel, moveable, multi-anode x-ray source for imaging detector calibrations, 19:1803 (R;US)
X-RAY SPECTROMETERS
Novel, moveable, multi-anode x-ray source for imaging detector calibrations, 19:1803 (R;US)
Ultrasoft X-ray spectrometer for light impurities research in tokamak plasmas, 19:2658 (RA;CZ)
XENON
Atomic probes of surface structure and dynamics: Technical progress report, September 15, 1991–September 14, 1992, 19:1156 (R;US)
XI PARTICLES
Formation of a Ξ-hypernucleus and transitions to double-Λ states, 19:2431 (R;JP)

Y

Y-12 PLANT
Manufacturing overview at the Department of Energy Oak Ridge facilities, 19:1408 (R;US)
Remedial investigation work plan for Bear Creek Valley Operable Unit 4 (shallow groundwater in Bear Creek Valley) at the Oak Ridge Y-12 Plant, Oak Ridge, Tennessee, 19:414 (R;US)
YANG-MILLS THEORY
A method for obtaining quantum doubles from the Yang-Baxter R-matrices, 19:2291 (R;RU)
YAYOI REACTOR
Annual report of Nuclear Engineering Research Laboratory, University of Tokyo in fiscal 1992, 19:2818 (R;JP;In Japanese)
Report of the research results with University of Tokyo, Nuclear Engineering Research laboratory's Facilities in fiscal 1992, 19:2819 (R;JP;In Japanese)
YEARS LIVING RADIOISOTOPES

URANIUM 234
URANIUM 235
URANIUM 238
Calculated cross sections for production and destruction of some long-lived nuclides of importance in fusion energy applications, 19:2794 (R;US)
YTTERBIUM 176 TARGET
High-spin nuclear target of $^{178m}{}_2$Hf: creation and nuclear reaction studies, 19:2453 (R;RU)
YTTRIUM 89 TARGET
Isobaric and mass distribution in the interaction of 3.65 A GeV ^{12}C with yttrium and silver, 19:2492 (IA;UA)
YTTRIUM ALUMINIUM GARNETS
See ALUMINIUM OXIDES
YTTRIUM COMPOUNDS
YTTRIUM COMPLEXES
Preparation, characterization and thermal behaviour study of lanthanides (III) and yttrium (III) 4-methoxy benzylidene pyruvate in solid state, 19:1171 (I;BR;In Portuguese)
Thermal decomposition of lanthanides (III) and yttrium (III) solid complexes from ethyl ene diamine tetraacetic acid, 19:1166 (I;BR;In Portuguese)
YTTRIUM COMPOUNDS
See also YTTRIUM OXIDES
YTTRIUM PHOSPHATES
YTTRIUM SULFIDES
Preparation, characterization and thermal behaviour study of double selenates of lanthanides, yttrium and beryllium, 19:1170 (I;BR;In Portuguese)
Thermal decomposition of double selenates of lanthanides (III), yttrium (III) and ammonium, 19:1172 (I;BR;In Portuguese)
Thermal decomposition of lanthanides (III) and yttrium (III) selenates, 19:1173 (I;BR;In Portuguese)
YTTRIUM IONS
Column chromatographic separation of Y^{3+} from Sr^{2+} by polymeric ionizable crown ether resins, 19:1304 (R;US)
YTTRIUM OXIDES
Atomic and magnetic structure of $YBa_2(Cu_{1-x}Fe_x)_3O_{6+y}$ at $0.05 \leq x \leq 0.30$, $y \simeq 1$ and $y \simeq 0.5$, 19:2579 (R;RU;In Russian)
Fiber optic temperature sensor using a Y_2O_2S:Eu thermographic phosphor, 19:1812 (R;US)
Synthesis and characterization of charge-substituted garnets $YCaLnGa_5O_{12}$ (Ln = Ce,Pr,Tb), 19:1068 (R;US)
YTTRIUM PHOSPHATES
Spectroscopic studies of magnetic transitions in $TbPO_4$, 19:1230 (R;US)
YTTRIUM SULFIDES
Fiber optic temperature sensor using a Y_2O_2S:Eu thermographic phosphor, 19:1812 (R;US)

YUCCA MOUNTAIN
An approach to validation of thermomechanical models, 19:319 (R;US)
Geologic evaluation of six nonwelded tuff sites in the vicinity of Yucca Mountain, Nevada for a surface-based test facility for the Yucca Mountain Project, 19:274 (R;US)
Unconfined compression experiments on Topopah Spring Member tuff at 22°C and a strain rate of 10^{-9} s^{-1}: Data report: Yucca Mountain Site Characterization Project, 19:2273 (R;US)

Z

Z NEUTRAL BOSONS
A measurement of the forward-backward asymmetry and $\sin^2\theta_W$ from the process $Z^0 \rightarrow \mu^+\mu^-$ at $\sqrt{s} = 1.8$ TeV, 19:2379 (R;US)
SDC hadronic mass resolutions in Z and Z′ decays, 19:2372 (R;US)
SLD results from the study of polarized Z^0 produced at the SLC, 19:2401 (R;US)
Studies of QCD B-physics and jet handedness at SLD, 19:2400 (R;US)
Using invisible decay modes as probes of Z′ couplings, 19:2369 (R;US)
Z PINCH DEVICES (LINEAR)
See LINEAR Z PINCH DEVICES
ZEOLITES
Multicomponent liquid ion exchange with chabazite zeolites, 19:1219 (R;US)
Study of iron exchanged zeolites by Moessbauer effect and electron spin resonance spectroscopy., 19:1251 (I;MX;In Spanish)
ZET PINCH
See LONGITUDINAL PINCH
ZHURAVLEV PROCESS
See COAL GASIFICATION
ZINC
Recycling galvanized steel: Operating experience and benefits, 19:925 (R;US)
ZINC COMPOUNDS
See also ZINC OXIDES
Testing of zinc titanate desulfurization sorbents for moving-bed applications, 19:10 (R;US)
ZINC OXIDES
High temperature hydrogen sulfide removal with tin oxide, 19:9 (R;US)
ZnO thin films with c-axis orientation prepared on the room temperature substrate by the ECR multipolar plasma sputtering method, 19:2587 (R;CN)
[Scanning tunnelling microscopy and spectroscopy of ceramic grain boundaries]: [Annual report, September 1992–September 1993], 19:1083 (R;US)
ZIRCALOY 4
End-of-life irradiation performance of core structural components in the Shippingport Light Water Breeder Reactor, 19:710 (R;US)
ZIRCON
Comparison of thermal stability between internal and external surfaces of zircon, 19:1199 (IA;CN)
U-Pb age in meta volcanic zircon of greenstone from Supergrupo Andorinhas; delimitation of Archean stratigraphy from Carajas, Para State, Brazil, 19:1192 (I;BR;In Portuguese)
Zircons and fluids: An experimental investigation with applications for radioactive waste disposal: Stability of zircons: Progress report, January 1992–December 1992, 19:247 (R;US)
ZIRCONIUM
Phase transformations in Cu-Zr multilayers, 19:1061 (R;US)
Resonance ionization spectroscopy of zirconium atoms, 19:2544 (R;US)
ZIRCONIUM ALLOYS
Thermal, electrical and mechanical properties during cristallization of the amorphous alloy $Co_{33}Zr_{67}$, 19:1009 (I;DE;In German)
Using the rule of mixtures to examine the hardness of Cu/Cu-Zr multilayers, 19:1063 (R;US)
ZIRCONIUM CARBIDES
Synthesis of (U,Zr)C solid solutions under exothermic conditions, 19:1095 (R;US)
Vaporization behavior of non-stoichiometric refractory carbide materials and direct observations of the vapor phase using laser diagnostics, 19:1094 (R;US)
ZIRCONIUM OXIDES
Crystal structure and short-range oxygen defects in La- and Nd-modified ZrO_2, 19:1071 (R;US)
Gas-pressure forming of superplastic ceramic sheet, 19:1103 (R;US)

Contract Number Index

Numbers assigned to DOE contracts announced in documents in this publication are listed. Contract numbers are sorted alphanumerically and list the primary corporate author of the document cited, the citation number, and the report number or other document identification.

Contract No.	Abstract No.	Report No.
AC01-90CE23821	**Little (Arthur D.), Inc., Cambridge, MA (United States)**

Report Number Index

The report number index consists of the alphanumeric identifiers assigned to report literature as well as patent and conference literature cited in this publication. Entries provide the abstract number; the source(s) of availability of the document; the GPO file prefix for GPO depository library documents; the order number for OSTI and NTIS report ordering purposes; and, if the document was distributed under the DOE distribution program, the category number is shown for paper copy (PC), microfiche (MF), or no distribution (ND). These categories are included to assist DOE librarians in responding to requests for reports in their collections. The index also lists secondary numbers, with the corresponding abstract numbers and cross-references to other identifying numbers.

Report Number	*Abstract Number*	*Source of Availability*	*GPO Dep.*	*Order Number*	*Distribution Category*

Codes Used on Index Lines

Following the citation numbers in the Corporate Author, Personal Author, and Subject Indexes, codes are used to designate the type of document, country of publication, and language of the document, e.g., (R;SU;In Russian). The language designator does not appear if the document is published in English.

ORDER FORM

DOE and DOE Contractors: Fill in Parts I, II, and IV. **Others:** Fill in Parts I, III, and IV. Mark appropriate blanks in Part IV to indicate quantity and form (microfiche or paper copy).

I. SHIPPING AND PAYMENT INFORMATION

Ordering Address

Name _____ Telephone _____

Address _____

City _____ State _____ Zip _____

Shipping Address (if different from above)

Name _____

Address _____

City _____ State _____ Zip _____

_____

SIGNATURE (Required to validate ALL orders)

II. OSTI ORDERS (DOE and DOE contractors can order from OSTI.)

☐ Charge OSTI deposit account no. _____

☐ Charge to my ☐ VISA ☐ Mastercard

_____ _____

Account Number — Card expiration date

Mail orders to: U.S. Department of Energy
Office of Scientific and Technical Information
P.O. Box 62
Oak Ridge, TN 37831

III. NTIS ORDERS

☐ Charge NTIS deposit account no. _____

☐ Check/Money Order enclosed for $ _____

☐ Charge to my ☐ American Express ☐ VISA ☐ Mastercard

_____ _____

Account Number — Card expiration date

☐ Ship and Bill (see below for restrictions) _ _ – _ _ _ – _ _ _ _

Employer identification number (9 digits) –

Purchase Order number _____

Phone number of billing office _____
(Required for Ship & Bill orders)

Ship & Bill service is restricted to North American business locations for an extra $7.50 per order (or per Custom Search). The business' employer identification number plus the phone number of the office paying the bill are required to process these requests. A late payment charge will be applied to billings more than 30 days overdue. Prepaying, using an NTIS Deposit Account or a charge account, speeds order processing. Be sure payment and order are sent together. Checks, payable to NTIS, must be in U.S. dollars.

Mail orders to: U.S. Department of Commerce
Technology Administration
National Technical Information Service
Springfield, VA 22161

IF NO METHOD OF PAYMENT IS INDICATED, YOUR ORDER WILL BE RETURNED TO YOU AS A PRICE QUOTE UNPROCESSED.

IV. SELECTIONS

Order number _____ Report number _____

Federal Depository Library Program

As a result of an agreement between the U.S. Government Printing Office (GPO) and the Department of Energy, beginning in 1984 DOE reports with unlimited distribution are now included in the Federal Depository Library Program. The Regional Depository Libraries listed below receive and retain at least one copy of nearly every Federal Government publication, either in printed or microfilm form, for use by the general public. These libraries provide reference services and interlibrary loans; however, they are not sales outlets. You may wish to ask your local library to contact a Regional Depository to help you locate specific publications, or you may contact the Regional Depository yourself. Do not send checks or orders to these libraries.
